In the context of Honduras, HVPs include prostitutes, men who have sex with men (MSM), persons living with HIV/AIDS

(PLWHAs), prisoners, and members of the Garifuna and other ethnic groups. Strategic Information is defined as: programs and activities supporting the implementation of first and second generation epidemiological surveillance survey activities; systems for monitoring and evaluation of the impact of the multi-sectoral national response to HIV/AIDS; and strategic initiatives to improve infrastructure and systems supporting surveillance, prevention, care and treatment, laboratory and information management activities.

The Catalog of Federal Domestic Assistance number for this program is 93.941.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Administration for Children and Families****Agency Recordkeeping/Reporting Requirements Under Emergency Review by the Office of Management and Budget (OMB)**

Title: Fourth National Incidence Study of Child Abuse and Neglect (NIS-4).

OMB No.: New Request.

Description: The Department of Health and Human Services intends to issue letters to recruit agencies for participation in the next National Incidence Study of Child Abuse and Neglect (NIS). This will be the fourth cycle of this periodic study. The NIS-1, mandated under Public Law (Pub. L.) 93-247 (1974), was conducted in 1979 and 1980 and reported in 1981. The NIS-2 was mandated under Pub. L. 98-457 (1984), conducted in 1986 and 1987, and reported in 1988. The NIS-3 was mandated under both the Child Abuse Prevention, Adoption and Family Services Act of 1988 (Pub. L. 100-294) and the Child Abuse, Domestic Violence, Adoption and Family Services Act of 1992 (Pub. L. 102-295), conducted between 1993 and 1995, and published in 1996. The NIS-4 is mandated by the Keeping Children and Families Safe Act of 2003 (Pub. L. 108-36).

The NIS is unique in that it goes beyond the abused and neglected children who come to the attention of the Child Protective Services (CPS) system. In contrast to the National Child Abuse and Neglect Data Systems (NCANDS), which rely solely on reported cases, the NIS design assumes that reported children represent only a portion of the children who actually are maltreated. Following the implications of its assumption, the NIS estimates the scope of the maltreated child population by combining information about reported cases with data on maltreated children identified by professionals (called "sentinels") who encountered them during the normal course of their work in a wide range of agencies in representative communities. These professionals are asked to remain on the lookout for children they believe are
