

of Chile's trade surplus. During calendar year 2003, the most recent year for which data is available, Chile's imports of the foregoing goods exceeded its exports by 186,269.7 metric tons according to data published by its customs authority, the Servicio Nacional de Aduana. Accordingly, based on this data, USTR determines that Chile's trade surplus for 2004 is negative.

**SUPPLEMENTARY INFORMATION:** The Federal Aviation Act (the Act) at 49 U.S.C. 41722, authorizes the Secretary of Transportation to request air carriers to attend a meeting with the FAA Administrator to discuss flight schedule reductions at any severely congested airport during peak operating hours. On January 8, 2004, following several months in which delays at O'Hare and emanating from the airport through the national airspace system had reached unacceptable levels, the Administrator determined that such a meeting regarding severe congestion at O'Hare was necessary. On January 16, 2004, the Secretary then made a similar determination that a meeting was needed to meet a serious transportation need or important public benefit.

Before the scheduling reduction meeting was to occur, the FAA separately obtained the agreement of the two largest operators at O'Hare, American Airlines and United Airlines, to reduce their scheduled operations, and the FAA thereafter issued an order implementing the reductions in their scheduled service during peak hours. See FAA Orders issued in this Docket on January 21, 2004, and amended on April 21, 2004. In these Orders, we made clear our intention to conduct a scheduling reduction meeting if the consensual reductions did not achieve their desired effect.

The Orders limiting scheduled operations during certain hours at O'Hare by American Airlines and United Airlines will expire as of October 30, 2004. Moreover, even with the reductions by those carriers, the statistics for air traffic at O'Hare continue to show overscheduling and excessive delays. Daily scheduled operations published for August remain approximately 170 flights above the daily August 2003 scheduled flights. Several of the busiest traffic days ever recorded at O'Hare occurred since late June. On July 1, there were 2,968 operations, just 8 fewer than the previous record on August 31, 2001. In May 2004, a NAS monthly record of 14,495 total delays was also established. Although the level of delays has fluctuated from month to month, and weather has played a major factor, the overall trend of delays remains unacceptably high when recent periods are compared to the period before November 2003. The cumulative number of delays for this calendar year
