

development of more accurate abundance estimations; (f) characterize whale vocalizations; and (g) characterize sound pressure levels to which whales are exposed. Tagged whales will be approached for photo-identification, behavioral observation and assessment of possible tag effects;

(2) Tag 100 killer whales (*Orcinus orca*) over a five-year period not to exceed 20 in a single year. This would occur on an opportunistic basis, should killer whales be encountered during tagging activities with other species. The objectives of this research are to document killer whale movements and seasonal distribution patterns;

(3) Conduct non-invasive Level B harassment (photo-identification and behavioral observation) on the other non-target non-endangered/threatened marine mammal species encountered during tagging activities, in order to contribute to the knowledge of species (or situations) for which little information has been documented; and

(4) Import and export marine mammal biopsy samples and baleen from beach-cast (dead) whales. Baleen will be used for isotopic ratio analysis which may help validate movements between ocean areas with distinctive isotopic ratio signatures. Biopsy samples would be analyzed in different laboratories depending upon the species in question or the specific tests being conducted. Samples would be imported/exported on a worldwide basis.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Consideration will be given to all comments received by September 2, 3004.

Title and OMB Number: Customer Satisfaction Survey—Generic Clearance; OMB Number 0704-0403.

Type of Request: Extension.

Number of Respondents: 790.

Responses per Respondent: 1.

Annual Responses: 790.

Average Burden per Response: 10 minutes.

Annual Burden Hours: 132.

Needs and Uses: This information collection requirement is necessary to assess the level of service the Defense Technical Information Center (DTIC) provides to its current customers. The surveys will provide information on the level of overall customer satisfaction, and on customer satisfaction with several attributes of service that impact the level of overall satisfaction. These customer satisfaction surveys are required to implement Executive Order 12862, "Setting Customer Service Standards." Respondents are DTIC registered users who are components of the Department of Defense, Military Services, other Federal government Agencies, U.S. Government contractors, university involved in Federally funded research, and participants. The information obtained by these surveys will be used to assist agency senior management in determining agency business policies and processes that should be selected for examination,
