II. Did EPA Conditionally Approve the Application?

A conditional registration may be granted under section 3(c)(7)(C) of FIFRA for a new active ingredient where certain data are lacking, on condition that such data are received by the end of the conditional registration period and do not meet or exceed the risk criteria set forth in 40 CFR 154.7; that use of the pesticide during the conditional registration period will not cause unreasonable adverse effects; and that use of the pesticide is in the public interest. The Agency has considered the available data on the risks associated with the proposed use of Trypsin Modulating Oostatic Factor, and information on social, economic, and environmental benefits to be derived from such use. Specifically, the Agency has considered the nature and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of Trypsin Modulating Oostatic Factor during the period of conditional registration will not cause any unreasonable adverse effect on the environment, and that use of the pesticide is, in the public interest.

Consistent with section 3(c)(7)(C) of FIFRA, the Agency has determined that these conditional registrations are in the public interest. Use of the pesticides are of significance to the user community, and appropriate labeling, use directions, and other measures have been taken to ensure that use of the pesticides will not result in unreasonable adverse effects to man and the environment.

III. Conditionally Approved Registrations

EPA issued a notice, published in the **Federal Register** of October 9, 2002 (67 FR 62965) (FRL-7276-7), which announced that Insect Biotechnology Inc., 100 Capitola Drive, Suite 307, Durham, NC 27713, had submitted an application to conditionally register the pesticide product, Technical Trypsin Modulating Oostatic Factor (TMOF), insecticide (EPA File Symbol 74411-R), containing Trypsin Modulating Oostatic Factor at 100%, an active ingredient not included in any previously registered product.

The application was conditionally approved on May 24, 2004 as Technical Trypsin Modulating Oostatic Factor (TMOF) (EPA Registration Number 74411-1).

The product is registered as a manufacturing use product for formulation into insecticides for control of mosquito larvae. As the only condition of registration, EPA is requiring the registrant to provide a storage stability study by May 24, 2006.
