SUPPLEMENTARY INFORMATION:

NUREG-1792, "Good Practices for Implementing Human Reliability Analysis (HRA), Draft Report for Comment"

The purpose of Good Practices for Implementing Human Reliability Analysis (HRA) Draft Report for Comment is to provide guidance for performing HRA and reviewing HRAs to assess the quality of analyses. This report supports the NRC's activities for addressing probabilistic risk assessment (PRA) quality issues and supports the implementation of Regulatory Guide (RG) 1.200, "An Approach for Determining the Technical Adequacy of Probabilistic Risk Assessment Results For Risk-Informed Activities."

The HRA good practices described in NUREG-1792 are generic; that is, they

are not tied to any specific methods or tools that could be used for doing HRAs. The document provides guidance for implementing the RG 1.200 when performing a Level 1 and a limited Level 2 PRA for internal events (excluding fire) with the reactor at full power. The good practices are directly linked to RG 1.200, which reflects and endorses, with certain clarifications and substitutions, the American Society of Mechanical Engineers (ASME) standard RA-Sa-2003, "Addenda to ASME Standard for Probabilistic Risk Assessment for Nuclear Power Plant Applications," and Revision A3 of the Nuclear Energy Institute (NEI) document "Probabilistic Risk (PRA) Peer Review Process Guidance" (NEI-00-02).

The NRC will hold a public meeting on August 16, 2004, at the NRC headquarters, 11545 Rockville Pike, Rockville, Maryland, Room T-10A1 (8:30 am—5 pm, preliminary agenda attached). The purpose of the meeting is to present and discuss the HRA good practices and to allow stakeholders to address issues needing clarification. The NRC is not soliciting comments on the draft NUREG as part of this meeting. Public comments on the draft NUREG can be provided as discussed above.

The NRC is seeking public comment in order to receive feedback from the widest range of interested parties and to ensure that all information relevant to developing this document is available to the NRC staff. This document is issued for comment only and is not intended for interim use. The NRC will review public comments received on the document, incorporate suggested changes as necessary, and issue the final NUREG-1792 for use.

Dated at Rockville, MD, this 28th day of July 2004.

For the Nuclear Regulatory Commission,
Charles Ader,

Director, Division of Risk Analysis and Applications, Office of Nuclear Regulatory Research.
