SUPPLEMENTARY INFORMATION:

Title: Exotic Newcastle Disease in Birds and Poultry; Chlamydiosis in Poultry.

OMB Number: 0579-0116.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture regulates the importation and interstate movement of animals and animal products, and conducts various other activities to protect the health of our Nation's livestock and poultry.

In connection with this mission, APHIS regulates the interstate movement of certain poultry, birds, and other items from premises and areas that may be quarantined because of exotic Newcastle disease (END) and chlamydiosis. The regulations contained in 9 CFR part 82 restrict the interstate movement of poultry, birds, and other items (such as eggs, carcasses, vehicles, containers, and coops) to help prevent the spread of END and chlamydiosis and require the use of certain information collection activities, including the completion of permit applications attesting to the health status of the birds or poultry being moved, the number and types of birds
