Title: Application for Reimbursement to Local Governments for Emergency Response to Hazardous Substance Releases Under CERCLA section 123.

Abstract: The Agency requires applicants for reimbursement under this program authorized under Section 123 of CERCLA to submit an application that demonstrates consistency with program eligibility requirements. This is necessary to ensure proper use of the Superfund. EPA reviews the information to ensure compliance with all statutory and program requirements. The applicants are local governments who have incurred expenses, above and beyond their budgets, for hazardous substance response. Submission of this information is voluntary and to the applicant's benefit. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: In the previously approved ICR, the estimated number of respondents was 200, and the annual reporting and recordkeeping burden for this collection is estimated to average 9 hours per response. The estimated total annual burden is approximately 1,800 hours, and there are no capital/startup or operations and maintenance costs associated with this ICR. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: July 16, 2004.

Dana S. Tulis,

Acting Director, Office of Emergency Prevention, Preparedness and Response.
