

4. The percentage that the number of ballots disqualified is of the number of ballots received;

5. The number of nominees for each seat up for election;

6. The race, ethnicity, and gender of each nominee, and

7. The final election results (including the number of ballots received by each nominee).

B. After each election, the FSA national office shall compile the county election reports into a national election report to the Secretary. The national election report shall also be available to anyone requesting a paper copy of the report and also shall be posted to the FSA Web-site. The national election report shall include election data on SDA County Committee representation by county.

C. Not later than 90 days after the date an election is held, each County Committee shall file a separate written election reform report with the FSA State and national offices detailing its efforts to comply with the uniform guidelines and FSA regulations and directives on County Committee elections. This report must contain a detailed description of county office outreach efforts. The FSA national office shall provide specific guidance to the county offices on the form and contents of this report.

D. Based on the county election reports and the county election reform reports, the FSA national office shall provide feedback and guidance to FSA county and State offices on the election process, including outreach efforts. The FSA national office shall also, based on its review of the county election reform reports, as well as its analysis of the data on SDA representation, submit an annual report to the Secretary on election reform efforts, including recommendations on further improvements in the County Committee election process.

IV. Additional Election Reform Efforts

A. USDA shall consider additional efforts to ensure such fair representation. Such additional efforts may include, but are not limited to, compliance reviews of selected counties by FSA's and USDA's Offices of Civil Rights; consideration of at-large seats or cumulative voting for certain County Committees; further centralization of the election process; and the issuance of provisions allowing for the appointment of an SDA voting member to particular committees pursuant to the 2002 Farm Bill.

V. Implementation of Uniform Guidelines

A. The FSA national office shall ensure that it issues all appropriate regulations, instructions, directives, notices, and manuals to implement the terms of these uniform guidelines.

B. FSA shall institute a comprehensive monitoring process, including spot checks on selected counties, to ensure compliance with these guidelines and FSA regulations and directives on the County Committee process.

C. The FSA national office shall ensure that appropriate training of FSA county offices, including County Committees, is conducted on the implementation of these guidelines and of FSA's regulations and directives on the County Committee election process.

D. These uniform guidelines shall take effect immediately unless the date for a specific action in these guidelines has passed upon issuance of the guidelines.

Signed in Washington, DC, August 11, 2004.

Ann M. Veneman,

Secretary of Agriculture.

SUPPLEMENTARY INFORMATION:

Title: Asian Longhorned Beetle Regulations.

OMB Number: 0579-0122.

Type of Request: Extension of approval of an information collection.

Abstract: The United States Department of Agriculture (USDA) is

responsible for, among other things, the control and eradication of plant pests. The Plant Protection Act authorizes the Department to carry out this mission.

The Plant Protection and Quarantine (PPQ) program of USDA's Animal and Plant Health Inspection Service (APHIS) is responsible for implementing the provisions of the Act and does so through the enforcement of its domestic quarantine regulations in 7 CFR part 301.

The Asian longhorned beetle (native to China, Japan, Korea, and the Isle of Hainan) is a destructive pest of hardwood trees, including maple, elm, ash, and horse chestnut. In addition, nursery stock, logs, green lumber, firewood, stumps, roots, branches, and wood debris of a half an inch or more in diameter are subject to infestation. The beetles bore into the heartwood of host trees, eventually killing the tree.

The Asian longhorned beetle has been found in hardwood trees in the boroughs of Brooklyn, Manhattan, and Queens in the city of New York, NY, and in portions of Nassau and Suffolk Counties, NY. The Asian longhorned beetle has also been found in portions of Cook and DuPage Counties, IL, and portions of Hudson County, NJ. If this insect spreads into the hardwood forests of the United States, it could cause substantial economic harm to the U.S. nursery and forest product industries.

To prevent this, we have regulations in place (7 CFR 301.51-1 through 301.51-9) quarantining the areas described above. These regulations also restrict the movement of regulated articles (such as nursery stock, green lumber, firewood, and other items) from these quarantined areas.

These regulations are designed to prevent the spread of the Asian longhorned beetle within the United States. Implementing the regulations requires us to engage in certain information collection activities, which necessitates the use of several forms, including limited permits, certificates, and compliance agreements.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.4318 hours per response.

Respondents: Growers, shippers, exporters, and State plant health officials.

Estimated annual number of respondents: 475.

Estimated annual number of responses per respondent: 1.1894.

Estimated annual number of responses: 565.

Estimated total annual burden on respondents: 244 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of August 2004.

W. Ron DeHaven,

Administrator, Animal and Plant Health Inspection Service.
