Paperwork Reduction Act

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the Federal Register. A major rule cannot take effect until 60 days after it is published in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 18, 2004. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur oxides.

Norman Niedergang,
Acting Regional Administrator, Region 5.

---

**PART 52—[AMENDED]**

1. The authority citation for part 52 continues to read as follows:

   **Authority:** 42 U.S.C. 7401 et seq.

**Subpart Y—Minnesota**

2. Section 52.1220 is amended by adding paragraph (c)(65) to read as follows:

   § 52.1220 Identification of plan.

   (c) * * * * *

   (65) The Minnesota Pollution Control Agency submitted a revision to Minnesota’s State Implementation Plan for sulfur dioxide on December 19, 2002. This revision consists of a Title V permit for the United Defense, LP facility located in Anoka County at 4800 East River Road, Fridley, Minnesota. The Permit contains non-expiring Title I SIP conditions.

   (i) Incorporation by reference.

   (A) Title I conditions contained in the November 25, 2002, Title V permit (permit number 00300020–001) issued to the United Defense, LP facility located in Anoka County at 4800 East River Road, Fridley, Minnesota.

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 63**

**RIN 2060–AK73**

**National Emission Standards for Hazardous Air Pollutants for Stationary Combustion Turbines**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; stay.

**SUMMARY:** The EPA is staying the effectiveness of two subcategories of the National Emission Standards for Hazardous Air Pollutants (NESHAP) for stationary combustion turbines: Lean premix gas-fired turbines and diffusion flame gas-fired turbines. Pending the outcome of EPA’s proposal to delete these subcategories from the source category list (68 FR 18338, April 7, 2004), EPA is staying the effectiveness of the emissions and operating limitations in the stationary combustion turbines NESHAP for new sources in the lean premix gas-fired turbines and diffusion flame gas-fired turbines subcategories. This action is necessary to avoid wasteful and unwarranted expenditures on installation of emission controls which will not be required if the subcategories are delisted.

**DATES:** The final rule is effective on August 18, 2004.

**ADDRESSES:** EPA has established a docket for this action under Docket ID No. OAR–2003–0196. All documents in the docket are listed in the EDOCKET index at http://www.epa.gov/edocket. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in EDOCKET or in hard copy at the EPA Docket Center (Air Docket), EPA/DC, EPA West, Room B–102, 1301 Constitution Avenue, NW., Washington, DC 10460. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the Air Docket is (202) 566–1742.

**FOR FURTHER INFORMATION CONTACT:** Ms. Kelly Rimer, Office of Air Quality Planning and Standards, Emission Standards Division, C404–01, Environmental Protection Agency, Research Triangle Park, NC 27709; telephone number: (919) 541–2962; fax number: 919–541–0840; e-mail address: rimer.kelly@epa.gov.

**SUPPLEMENTARY INFORMATION:** Regulated Entities. Categories and entities potentially regulated by this action include:

</table>
This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. To determine whether your facility is affected by this action, you should examine the applicability criteria in §63.6085 of the final rule and the subcategory definitions in §63.6090. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding FOR FURTHER INFORMATION CONTACT section.

I. Summary of Final Rule

EPA is issuing a final rule to stay the effectiveness of the emission standards for new sources in two subcategories of the NESHAP for stationary combustion turbines. The effect of this stay is to suspend the obligation of sources in the four subcategories to comply with the emission standards and related operating requirements set forth in 40 CFR part 63, subpart YYYYY. This stay is effective immediately upon publication in the Federal Register.

Under this stay, new sources in the four subcategories will be subject to the final standards. This would have caused some sources to exceed the control levels established by the final rule before meeting the demonstration of compliance they would have had if there had been no stay.

II. Background

The final MACT standards for stationary combustion turbines were published on March 5, 2004 (69 FR 10512). These standards, codified at 40 CFR part 63, subpart YYYYY, define the subcategories for the Stationary Combustion Turbines source category. On April 7, 2004, EPA proposed a rule to amend the list of categories of sources that was developed pursuant to Clean Air Act (CAA) section 112(c)(1)(B) (69 FR 18327). EPA proposed to delete four subcategories from the Stationary Combustion Turbines source category. The subcategories proposed for deletion are: (1) Lean premix gas-fired stationary combustion turbines (also referred to herein as “lean premix gas-fired turbines”), (2) diffusion flame gas-fired stationary combustion turbines (also referred to herein as “diffusion flame gas-fired turbines”), (3) emergency stationary combustion turbines, and (4) stationary combustion turbines located on the North Slope of Alaska.

The proposed rule to amend the source category list was issued in part upon the Administrator’s own motion. Petitions to remove a source category from the source category list are permitted under section 112(c)(9) of the CAA. The proposed rule to delete the four subcategories is based on an initial determination by EPA that the subcategories satisfy the substantive criteria for deletion set forth in section 112(c)(9)(B). The proposed rule to delete the four subcategories contains a detailed description of the technical basis for the initial determination. At the same time that EPA proposed to delist the four combustor subcategories, we also proposed a companion action to stay the effectiveness of the standards in the four combustor subcategories (69 FR 18338, April 7, 2004).

III. Basis for Stay

Although EPA proposed to delete from the source category list four subcategories established by the final MACT standards for stationary combustion turbines, CAA section 112(d)(10) provides that the standards as promulgated for the four subcategories take effect upon publication of the standards. Without a stay, all turbines in the lean premix gas-fired turbine and the diffusion flame gas-fired turbine subcategories which were constructed or reconstructed after January 14, 2003, would have been required to comply immediately with the emission standards for new sources. This would have caused some sources in the two subcategories to make immediate expenditures on installation and testing of emission controls, even though such controls will not be required if we issue a final rule to delete these subcategories. In view of our initial determination that the statutory criteria for delisting have been met for all sources in the four subcategories, we consider it inappropriate and contrary to statutory intent to mandate such expenditures until a final determination has been made whether or not these subcategories should be delisted. Such expenditures would be wasteful and unwarranted if we take final action to delist these subcategories. Moreover, if we take final action to delist the subcategories, sources constructed or reconstructed while the rulemaking to delist is pending would bear a regulatory burden not placed on identical sources constructed or reconstructed thereafter. Accordingly, we are issuing this stay to avoid the effectiveness of the emission standards for new sources in the four combustor subcategories until promulgation of final MACT standards for combustion turbines.

We are mindful that there would be no need to stay the effectiveness of the standards for new sources in the two subcategories if a rulemaking to delist the affected sources had been completed before promulgation of the final MACT standards for combustion turbines. However, we note that the GTPA petition was not submitted until quite late in the rulemaking process. Moreover, we generally do not make a definite determination concerning the characteristics of subcategories until promulgation of final MACT standards. In these circumstances, we do not believe it would be fair to make certain affected sources bear the burden of a delay in our determination that a subcategory meets the statutory criteria for delisting.

The final stay is consistent with the precedents we have established in similar circumstances in the past. In 1991, we issued a final rule staying the effective date of the National Emission...
Standards for Radionuclear Emissions from Federal Facilities Other Than Nuclear Regulatory Commission Licensees and Not Covered by Subpart H (40 CFR part 61, subparts H and I) for commercial nuclear power reactors during the pendency of another rulemaking to rescind the standards for those facilities (56 FR 37158, August 5, 1991). The rescission was authorized by section 112(d)(9) of the CAA (the “Simpson amendment”), which provides that we may decline to regulate Nuclear Regulatory Commission (NRC) licensees under CAA section 112 if the Administrator determines that the regulatory program established by the NRC for a category or subcategory provides an ample margin of safety to protect the public health. We had made an initial determination that the NRC program for commercial nuclear power reactors met this test, and we reasoned that “it would frustrate the evident purpose of Section 112(d)(9) if EPA were to permit Subpart I to take effect for this subcategory during the pendency of the rulemaking on rescission” (56 FR 37159). That action was not challenged.

In 1995, we acted to provide another type of interim relief during a delisting rulemaking. We suspended the listing of caprolactam during a rulemaking to delete caprolactam from the list of hazardous air pollutants established by CAA section 112(b)(1) for purposes of determining the applicability of title V permitting requirements (60 FR 081, September 18, 1995). We based that action on our determination that “retention, during the rulemaking to delist caprolactam, of permit application requirements which will no longer exist after the delisting process has been completed would result in unnecessary private and public expenditures on preparation, submission, and processing of such applications, and would yield no environmental benefits” (60 FR 084–85). That interim relief action also was not challenged.

IV. Summary of Comments and EPA Responses

The EPA received six comments on the proposed stay and all commenters supported the proposed EPA action; we received no comments opposing the stay.

V. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review

Under Executive Order 12866 (58 FR 51735, October 4, 1993), EPA must determine whether the regulatory action is “significant” and therefore subject to Office of Management and Budget (OMB) review and the requirements of the Executive Order. The Executive Order defines “significant regulatory action” as one that is likely to result in a rule that may:

1. Have an annual effect on the economy of $100 million or more or adverse affect in a material way the economy, a sector to the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities;
2. Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;
3. Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligation of recipients thereof; or
4. Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in Executive Order 12866.

Pursuant to the terms of Executive Order 12866, it has been determined that the final action constitutes a “significant regulatory action” because it may raise novel policy issues and is therefore subject to OMB review. Changes made in response to OMB suggestions or recommendations are documented in the public record (see ADDRESSES section of this preamble).

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. The final action stays the effectiveness of the combustion turbines NESHAP for new sources in the lean premix gas-fired and diffusion flame gas-fired turbines subcategories until a conclusion is reached regarding deletion of these subcategories. Therefore, this rule eliminates the need for information collection for regulatory compliance purposes under the CAA.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously issued instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA’s regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

C. Regulatory Flexibility Act (RFA)

The EPA has determined that it is not necessary to prepare a regulatory flexibility analysis in connection with this final rule. For the purposes of assessing the impacts of today’s final rule on small entities, small entity is defined as: (1) A small business that meets the definitions for small business based on the Small Business Association (SBA) size standards which, for this final action, can include manufacturing (NAICS 33999–03) and air transportation (NAICS 4522–98 and 4512–98) operations that employ less than 1,000 people and engineering services operations (NAICS 8711–98) that earn less than $20 million annually; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impact of today’s final rule on small entities, EPA has concluded that this final action will not have a significant economic impact on a substantial number of small entities. In determining whether a rule has significant economic impact on a substantial number of small entities, the impact of concern is any significant adverse economic impact on small entities, since the primary purpose of the regulatory flexibility analysis is to identify and address regulatory alternatives “which minimize any significant economic impact of the final rule on small entities.” (5 U.S.C. 603 and 604). Thus, an agency may conclude that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, or otherwise has a positive economic effect on all of the small entities subject to the rule.

The final rule stays the effectiveness of the stationary combustion turbines NESHAP for new sources in the lean premix gas-fired turbines and diffusion flame gas-fired turbines subcategories. This will suspend the requirements to apply pollution controls and associated
operating, monitoring, and reporting requirements. These requirements will be permanently lifted if EPA ultimately removes the four source categories from the Stationary Combustion Turbines source category, and temporarily lifted if EPA does not ultimately delist the subcategories. We have, therefore, concluded that today’s final rule will relieve regulatory burden for all small entities.

D. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104-4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with “Federal mandates” that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any 1 year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

Today’s final rule contains no Federal mandates for State, local, or tribal governments or the private sector. The final rule imposes no enforceable duty on any State, local or tribal governments or the private sector. In any event, EPA has determined that the final rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and tribal governments, in the aggregate, or the private sector in any 1 year. Thus, today’s final rule is not subject to the requirements of sections 202 and 205 of the UMRA.

The EPA has determined that the final rule contains no regulatory requirements that might significantly or uniquely affect small governments. The final rule relieves a regulatory requirement.

E. Executive Order 13132, Federalism

Executive Order 13132 (64 FR 43255, August 10, 1999) requires EPA to develop an accountable process to ensure “meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.” The term “policies that have federalism implications” is defined in the Executive Order to include regulations that have “substantial direct effects on the States or the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.”

Under Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the final regulation. The EPA also may not issue a regulation that has federalism implications and that preempts State law unless the Agency consults with State and local officials early in the process of developing the final regulation.

Today’s action stays the effectiveness of the stationary combustion turbines NESHAP for new sources in the lean premix gas-fired turbines and diffusion flame gas-fired turbines subcategories. It does not impose any additional requirements on the States and does not affect the balance of power between the States and the Federal government. Thus, the requirements of section 6 of Executive Order 13132 do not apply to the final rule.

F. Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000), requires EPA to develop an accountable process to ensure “meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications.” The final rule does not have tribal implications, as specified in Executive Order 13175. The final action stays the effectiveness of the stationary combustion turbines NESHAP for new sources in the lean premix gas-fired turbines and diffusion flame gas-fired turbines subcategories. Executive Order 13175 does not apply to the final rule.

G. Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045 (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be “economically significant” as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that are based on health or safety risks, such that the analysis required under section 5–501 of the Executive Order has the potential to influence the regulation. The final rule is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because this action is not based on health or safety risks. Thus, Executive Order 13045 does not apply to the final rule.

H. Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

Executive Order 13211, “Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001), requires EPA to prepare and submit a Statement of Energy Effects to the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, for certain actions identified as “significant energy actions.” The final rule is not a “significant energy action” because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.
For the reasons set out in the preamble, Michael O. Leavitt, Administrator.

For the reasons set out in the preamble, the EPA decides not to use available and applicable voluntary consensus standards. The final rule does not direct all Federal agencies to use voluntary consensus standards instead of government-unique standards in their regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., material specifications, test method, sampling and analytical procedures, business practices, etc.) that are developed or adopted by one or more voluntary consensus standards bodies. Examples of organizations generally regarded as voluntary consensus standards bodies include the American Society for Testing and Materials (ASTM), the National Fire Protection Association (NFPA), and the Society of Automotive Engineers (SAE). The NTNTAA requires Federal agencies like EPA to provide Congress, through OMB, with explanations when an agency decides not to use available and applicable voluntary consensus standards. The final rule does not involve technical standards. Therefore, EPA did not consider the use of any voluntary consensus standards.

J. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing today’s final rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the comptroller General of the United States prior to publication of the rule in the Federal Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2). The final rule will be effective on August 18, 2004.

List of Subjects in 40 CFR Part 63

Environmental protection, Air pollution control, Hazardous substances, Reporting and recordkeeping requirements.

Dated: July 1, 2004.

Michael O. Leavitt,
Administrator.

For the reasons set out in the preamble, title 40, chapter I, part 63 of the Code of Federal Regulations is amended as follows:

PART 63—[AMENDED]

1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401, et seq.

Subpart YYYYY—National Emissions Standards for Hazardous Air Pollutants for Stationary Combustion Turbines

2. Section 63.6095 is amended by revising paragraph (a) and by adding paragraph (d) to read as follows:

§63.6095 When do I have to comply with this subpart?

(a) Affected sources. (1) If you start up a new or reconstructed stationary combustion turbine which is a lean premix oil-fired stationary combustion turbine or a diffusion flame oil-fired stationary combustion turbine as defined by this subpart on or before March 5, 2004, you must comply with the emissions limitations and operating limitations in this subpart no later than March 5, 2004.

(2) If you start up a new or reconstructed stationary combustion turbine which is a lean premix oil-fired stationary combustion turbine or a diffusion flame oil-fired stationary combustion turbine as defined by this subpart after March 5, 2004, you must comply with the emissions limitations and operating limitations in this subpart upon startup of your affected source.

(d) Stay of standards for gas-fired subcategories.

If you start up a new or reconstructed stationary combustion turbine that is a lean premix gas-fired stationary combustion turbine or diffusion flame gas-fired stationary combustion turbine as defined by this subpart, you must comply with the Initial Notification requirements set forth in §63.6145 but need not comply with any other requirement of this subpart until EPA takes final action to require compliance and publishes a document in the Federal Register.

BILLING CODE 6560–50–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. NHTSA–2003–15712]

Federal Motor Vehicle Safety Standards; Glazing Materials; Low Speed Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Final rule; delay of compliance date.

SUMMARY: NHTSA published a final rule in July 2003 that amended the Federal motor vehicle safety standard on glazing materials. The agency received several petitions for reconsideration of the rule. At present, the rule is to take effect on September 1, 2004. To allow for more time to respond to the petitions, this document delays the compliance date of the final rule.

DATES: This final rule becomes effective August 18, 2004. The compliance date of the final rule published on July 25, 2003 (68 FR 43964) and amended on September 26, 2003 (68 FR 55544) and on January 5, 2004 (69 FR 279) is delayed until September 1, 2006. Any petitions for reconsideration of today’s final rule must be received by NHTSA not later than October 4, 2004.

FOR FURTHER INFORMATION CONTACT:

You may send mail to any of these officials at the National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Table of Contents
I. Background
II. Petitions for Reconsideration
III. Today’s Final Rule; Delay of Compliance Date
IV. Regulatory Analyses and Notices

I. Background

Federal Motor Vehicle Safety Standard (FMVSS) No. 205 Glazing Materials specifies performance requirements for glazing installed in motor vehicles. It also specifies the
