Title: Assessment of EPA Compliance Assistance Projects.

Abstract: This information collection determines how well EPA compliance assistance tools and services meet customers needs and to assess the effectiveness of the assistance activities.

This will be a voluntary collection of information to gauge customer satisfaction with the compliance assistance projects, measure any resulting changes in knowledge and/or behavior, and evaluate any environmental and human health impacts. EPA proposes to use assessment surveys to provide the agency with feedback on the compliance assistance documents, onsite visits, telephone assistance, Web sites, and compliance assistance seminars and workshops delivered by headquarters and regional compliance assistance programs to the regulated community. This feedback will help EPA improve the quality and delivery of compliance assistance tools and services. This ICR will only provide anecdotal data for the purpose of informing EPA of the effectiveness of compliance assistance tools, and customer satisfaction with those tools. All assessments undertaken under this ICR will adhere to specific conditions to ensure that data is collected and used properly and efficiently. The information collection is voluntary, and will be limited to non-sensitive data concerning the quality of compliance assistance activities. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 9 minutes per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain,

or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: July 30, 2004.

Director, Office of Compliance.
