Title: Reporting and Recordkeeping Activities Associated With EPA's PFC Reduction/Climate Partnership for the Semiconductor Industry.

Abstract: The U.S. EPA's Office of Atmospheric Programs launched the PFC Reduction/Climate Partnership for

the Semiconductor Industry in 1996. Perfluorinated compounds (PFCs) are the most potent greenhouse gases known with atmospheric lifetimes of up to 50,000 years. These unique chemical compounds are required during two critical semiconductor manufacturing steps, plasma etching and CVD chamber cleaning. This important voluntary program contributes to the country's overall reduction in greenhouse gas emissions. The program uses a pollution prevention approach to reduce emissions and tracks progress by annually collecting PFC emissions estimates from partners.

EPA's semiconductor industry partners share information on technically feasible emission reduction strategies and EPA recognizes companies for their success in reducing PFC emissions through certificates, awards, and assistance in communicating their achievements with the public. In 2003, EPA's semiconductor industry partners were recognized for their commitment and ongoing efforts to protect the climate as participants in the White House's Climate VISION initiative. All semiconductor manufacturers operating in the U.S. are invited to join the partnership. Participation in the program begins by completing a Memorandum of Understanding that defines a voluntary agreement between the company and EPA. By joining the partnership, a company agrees to track and report an estimate of its PFC emissions to EPA annually. A designated third party assembles the reported data and protects any confidential or sensitive information prior to EPA review. The partner companies' annual reports will provide an estimate of total PFC emissions and a description of the estimating method. The partnership will track progress as a group using the aggregate annual PFC emissions estimate.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: In estimating the expected burden, EPA assumes 21 companies will participate during the three years covered by this proposed ICR.

Average annual reporting burden hours=11,426.

Average burden hours/response=247.

Frequency of response=1/year.

Estimated number of respondents=21.

Estimated total annual cost burden=\$839,464.

Total capital and start-up costs=\$0.

Total operation and maintenance costs=\$116,319.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: August 3, 2004.

Acting Chief, Non-CO₂ Programs Branch.
