DEPARTMENT OF THE INTERIOR**National Park Service****White-Tailed Deer Management Plan, Environmental Impact Statement, Catoctin Mountain Park, Maryland**

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of intent to prepare an environmental impact statement for the White-tailed Deer Management Plan, Catoctin Mountain Park.

SUMMARY: Under the provisions of the National Environmental Policy Act of 1969, the National Park Service is preparing an environmental impact statement for a White-tailed Deer Management Plan for Catoctin Mountain Park. The purpose of this action is to develop a range of alternatives for white-tailed deer management that supports forest regeneration providing for long-term protection, conservation, and restoration of native species and cultural resources. Management of white-tailed deer is needed because the white-tailed deer population in the park has been continually increasing, and browsing by large number of deer in Catoctin Mountain Park could adversely affect park resources and natural processes such as species of special concern, forest regeneration, and cultural landscapes.

Preliminary alternatives to meet these objectives include fencing and repellents, reproductive control, direct reduction, a special public hunt, and a combination of these management strategies. A no action alternative will also be analyzed.

DATES: The Park Service will accept comments from the public until September 24, 2004. In addition, the National Park Service intends to conduct public scoping meetings in the Catoctin Mountain Park area. Please check local newspapers, the park's Web site (<http://www.nps.gov/cato>) or contact the name listed below to find out when and where these meetings will be held.

ADDRESSES: Information will be available for public review and comment at the Catoctin Mountain Park Visitor Center at 6602 Foxville Road (intersection of Maryland Route 77 and Park Central Road).
