[Project No. 2100-119 California]

California Department of Water Resources; Notice of Availability of Final Environmental Assessment

August 19, 2004.

In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Energy Regulatory Commission's (Commission or FERC) regulations (18 CFR Part 380), the Commission staff reviewed an application for amendment to the approved recreation plan for the Feather River Project (FERC Project No. 2100) and prepared a final environmental assessment (FEA) on the application. The project is located on the Feather River in Butte County, California, near the city of Oroville.

Specifically, the project licensee, the California Department of Water Resources, requested that the Commission amend the approved recreation plan for the project to allow shared use of certain recreational trails within the project boundaries. In the FEA, the Commission staff analyzes the probable environmental effects of the proposed amendment and concludes that the proposal should not be approved at this time.

The FEA is attached to a Commission order titled "Order Denying Request to Amend Recreation Plan," which was issued August 17, 2004, and is available for review in the Commission's Public Reference Room located at 888 First Street, NE., Room 2A, Washington, DC 20426. The FEA also may be viewed on the Commission's website (<http://www.ferc.gov>) using the "eLibrary" link. [Project No. 2090-003]

Green Mountain Power Corporation; Notice of Availability of Environmental Assessment

August 20, 2004.

In accordance with the National Environmental Policy Act of 1969 and part 380 of the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380; FERC Order No. 486 and 52 FR 47,897, the Office of Energy Projects Staff (staff) reviewed the application for a new license for the Waterbury Hydroelectric Project, located on the Little River in the town of Waterbury in Washington County, Vermont, and prepared an environmental assessment (EA) for the project. The project does not use or occupy any federal facilities or lands.

In this EA, the staff analyzes the potential environmental effects of the existing project and concludes that licensing the project, with staff's recommended measures, would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Title: Establishing No-Discharge Zones Under Clean Water Act section 312.

Abstract: (A) Sewage No-discharge Zones: The need for EPA to obtain information for the establishment of no-discharge zones (NDZs) for vessel sewage in State waters stems from CWA sections 312(f)(3), (f)(4)(A), and (f)(4)(B),

and subsequent regulations at 40 CFR part 140.4(a-c). NDZs are established to provide State and local governments with additional protection of waters from treated or untreated vessel sewage. There are 3 ways in which NDZs for vessel sewage can be established. This ICR discusses the information requirements associated with the establishment of NDZs for vessel sewage. The responses to this collection of information are required to obtain the benefit of a sewage NDZ (*see* 33 U.S.C. 1322). The information collection activities discussed in this ICR do not require the submission of any confidential information.

(B) UNDS No-discharge Zones: Under section 312(n) of the Clean Water Act ("Uniform National Discharge Standards for Vessels of the Armed Forces" or "UNDS") NDZs for discharges from Armed Forces vessels may be established by either State prohibition or EPA prohibition following the procedures in 40 CFR Part 1700. UNDS also provides that the Governor of any State may petition EPA and the Secretary of Defense to review any determination or standard promulgated under the UNDS program if there is significant new information that could reasonably result in a change to the determination or standard. This ICR discusses the information that will be required from a State if it decides to establish a NDZ by State prohibition or apply for a NDZ by EPA prohibition, and the information that will be required from a State if it decides to submit a petition for review. The responses to this collection of information are required to obtain the benefit of an UNDS NDZ or a review of an UNDS determination or standard (*see* 33 U.S.C. 1322(n)). The information collection activities discussed in this ICR do not require the submission of any confidential information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
