

requirements on certain covered subjects. Covered subjects are:

(1) The designation, description, and classification of hazardous materials;

(2) The packing, repacking, handling, labeling, marking, and placarding of hazardous materials;

(3) The preparation, execution, and use of shipping documents related to hazardous materials and requirements related to the number, contents, and placement of those documents;

(4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous; or

(5) The design, manufacture, fabrication, marking, maintenance, reconditioning, repair, or testing of a packaging or container represented, marked, certified, or sold as qualified for use in transporting hazardous material.

The March 25, 2003 final rule addressed covered subject item (3) above and preempts State, local, or Indian tribe requirements not meeting the "substantively the same" standard. Federal hazardous materials transportation law provides at 49 U.S.C. 5125(b)(2) that, if RSPA issues a regulation concerning any of the covered subjects, RSPA must determine and publish in the **Federal Register** the effective date of Federal preemption. The effective date may not be earlier than the 90th day following the date of issuance of this final rule and not later than two years after the date of issuance. This interim final rule does not change the effective date of Federal preemption of the March 25, 2003 final rule, which was June 23, 2003.

#### C. Executive Order 13175

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13175 ("Consultation and Coordination with Indian Tribal Governments"). Because this final rule does not have tribal implications, does not impose substantial direct compliance costs on Indian tribal governments, and does not preempt tribal law, the funding and consultation requirements of Executive Order 13175 do not apply.

#### D. Regulatory Flexibility Act, Executive Order 13272, and DOT Procedures and Policies

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to review regulations to assess their impact on small entities. An agency must conduct a regulatory flexibility analysis unless it determines and certifies that a rule is not expected to have a significant impact on a substantial number of small

entities. This final rule applies to businesses, some of whom are small entities, that transport hazardous materials by air. This final rule provides an extension of the compliance date for notification and record retention requirements for air carriers. The compliance date extension assures that air carriers have sufficient time to reprogram their systems to meet the new requirements, test the reprogrammed system, develop training materials and train their employees. Therefore, I certify this rule will not have a significant economic impact on a substantial number of small entities.

This final rule has been developed in accordance with Executive Order 13272 ("Proper Consideration of Small Entities in Agency Rulemaking") and DOT's procedures and policies to promote compliance with the Regulatory Flexibility Act to ensure that potential impacts of draft rules on small entities are properly considered.

#### E. Paperwork Reduction Act

This final rule does not impose new information collection requirements.

#### F. Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

#### G. Unfunded Mandates Reform Act

This final rule does not impose unfunded mandates under the Unfunded Mandates Reform Act of 1995. It does not result in costs of \$120.7 million or more to either State, local or tribal governments, in the aggregate, or to the private sector, and is the least burdensome alternative that achieves the objective of the rule.

#### H. Environmental Assessment

This final rule will improve emergency response to hazardous materials incidents involving aircraft by ensuring information on the hazardous materials involved in an emergency is readily available. Improving emergency response to aircraft incidents will reduce environmental damage associated with such incidents. We find there are no significant environmental impacts associated with this final rule.

#### I. Privacy Act

Anyone is able to search the electronic form of any written

communications and comments received into any of our dockets by the name of the individual submitting the document (or signing the document, if submitted on behalf of an association, business, labor union, *etc.*). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477) or you may visit <http://dms.dot.gov>.

#### List of Subjects in 49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Reporting and recordkeeping requirements.

■ In consideration of the foregoing, 49 CFR chapter I is amended as follows:

#### PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 1. The authority citation for part 171 continues to read as follows:

**Authority:** 49 U.S.C. 5101–5127, 44701; 49 CFR 1.45 and 1.53; Pub. L. 101–410 section 4 (28 U.S.C. 2461 note); Pub. L. 104–134 section 31001.

#### § 171.14 [Amended]

■ 2. Amend § 171.14, paragraph (f), by removing the wording "October 1, 2004" and adding the wording "April 1, 2005" in both places it appears.

Issued in Washington, DC on August 18, 2004, under the authority delegated in 49 CFR part 1.

**Samuel G. Bonasso,**

*Deputy Administrator, Research and Special Programs Administration.*

## DEPARTMENT OF TRANSPORTATION

### National Highway Traffic Safety Administration

#### 49 CFR Part 541

[Docket No. NHTSA–2004–17359]

RIN 2127–AJ27

#### Final Theft Data; Motor Vehicle Theft Prevention Standard

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Publication of final theft data.

**SUMMARY:** This document publishes the final data on thefts of model year (MY) 2002 passenger motor vehicles that occurred in calendar year (CY) 2002. The final 2002 theft data indicate a decrease in the vehicle theft rate experienced in CY/MY 2002. The final

theft rate for MY 2002 passenger vehicles stolen in calendar year 2002 (2.49 thefts per thousand vehicles) decreased by 23.6 percent from the theft rate for CY/MY 2001 (3.26 thefts per thousand vehicles) when compared to the theft rate experienced in CY/MY 2001. Publication of these data fulfills NHTSA's statutory obligation to periodically obtain accurate and timely theft data and publish the information for review and comment.

**FOR FURTHER INFORMATION CONTACT:** Ms. Deborah Mazyck, Office of International Policy, Fuel Economy and Consumer Programs, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Mazyck's telephone number is (202) 366-0846. Her fax number is (202) 493-2290.

**SUPPLEMENTARY INFORMATION:** NHTSA administers a program for reducing motor vehicle theft. The central feature of this program is the Federal Motor Vehicle Theft Prevention Standard, 49 CFR part 541. The standard specifies performance requirements for inscribing and affixing vehicle identification numbers (VINs) onto certain major original equipment and replacement parts of high-theft lines of passenger motor vehicles.

The agency is required by 49 U.S.C. 33104(b)(4) to periodically obtain, from the most reliable source, accurate and timely theft data and publish the data for review and comment. To fulfill this statutory mandate, NHTSA has published theft data annually beginning with MYs 1983/84. Continuing to fulfill the § 33104(b)(4) mandate, this document reports the final theft data for CY 2002, the most recent calendar year for which data are available.

In calculating the 2002 theft rates, NHTSA followed the same procedures it used in calculating the MY 2001 theft rates. (For 2001 theft data calculations, see 68 FR 54857, September 19, 2003.) As in all previous reports, NHTSA's data were based on information provided to NHTSA by the National Crime Information Center (NCIC) of the Federal Bureau of Investigation. The NCIC is a government system that receives vehicle theft information from nearly 23,000 criminal justice agencies and other law enforcement authorities throughout the United States. The NCIC data also include reported thefts of self-insured and uninsured vehicles, not all of which are reported to other data sources.

The 2002 theft rate for each vehicle line was calculated by dividing the number of reported thefts of MY 2002 vehicles of that line stolen during calendar year 2002 by the total number

of vehicles in that line manufactured for MY 2002, as reported to the Environmental Protection Agency (EPA).

The final 2002 theft data show a decrease in the vehicle theft rate when compared to the theft rate experienced in CY/MY 2001. The final theft rate for MY 2002 passenger vehicles stolen in calendar year 2002 decreased to 2.49 thefts per thousand vehicles produced, a decrease of 23.6 percent from the rate of 3.26 thefts per thousand vehicles experienced by MY 2001 vehicles in CY 2001. For MY 2002 vehicles, out of a total of 225 vehicle lines, 38 lines had a theft rate higher than 3.5826 per thousand vehicles, the established median theft rate for MYs 1990/1991. (See 59 FR 12400, March 16, 1994.) Of the 38 vehicle lines with a theft rate higher than 3.5826, 34 are passenger car lines, three are multipurpose passenger vehicle lines, and one is a light-duty truck line.

On Tuesday, April 6, 2004, NHTSA published the preliminary theft rates for CY 2002 passenger motor vehicles in the **Federal Register** (69 FR 18010). The agency tentatively ranked each of the MY 2002 vehicle lines in descending order of theft rate. The public was requested to comment on the accuracy of the data and to provide final production figures for individual vehicle lines. The agency used written comments to make the necessary adjustments to its data. As a result of the adjustments, some of the final theft rates and rankings of vehicle lines changed from those published in the April 2004 notice. The agency received written comments from General Motors Corporation (GM) and Volkswagen of America, Inc. (VW).

In its comments, GM informed the agency that the Pontiac Grand Am was incorrectly listed as the "Grant Am" and the GMC Safari Van was incorrectly listed as the "Safara Van." The final theft data has been revised to reflect the correct nomenclature for the Pontiac Grand Am and the GMC Safari Van.

GM also informed the agency that the production volume for the Chevrolet Cavalier, the Chevrolet Astro Van, and the Saturn VUE is incorrect. In response to this comment, the production volume for the Chevrolet Cavalier, the Chevrolet Astro Van, and the Saturn VUE has been reviewed and the final theft list has been revised to correct those production errors. As a result of the correction, the Chevrolet Cavalier previously ranked No. 30 with a theft rate of 3.9232 remains ranked at No. 30 with a theft rate of 3.8780. The Chevrolet Astro Van previously ranked No. 119 with a theft rate of 1.7072 is now ranked No. 120

with a revised theft rate of 1.7196. The Saturn VUE previously ranked No. 188 with a theft rate of 0.6073 is now ranked No. 189 with a revised theft rate of 0.5970. Additionally, GM informed the agency that the production volume for the General Motors Funeral Coach/Hearse was listed incorrectly. As a result of the agency's review, the new information provided by GM resulted in no change to the ranking or theft rate for this line. Additionally, further analysis of the data revealed the Funeral Coach/Hearse is a Cadillac Funeral Coach/Hearse. The theft rate list has been revised to reflect the correction in its nomenclature.

Further reanalysis of the theft rate data revealed that the Cadillac Limousine, BMW M3 and BMW M5 were erroneously omitted from the April 6, 2004 publication of preliminary theft data. The agency has corrected the final theft data to include the theft rate information for the Cadillac Limousine, BMW M3 and BMW M5 vehicles. As a result of this correction, the Cadillac Limousine is ranked No. 213 with a theft rate of 0.0000, the BMW M3 is ranked No. 23 with a theft rate of 4.8012 and the BMW M5 is ranked No. 62 with a theft rate of 2.7510.

VW also informed the agency that the production volume for the Audi TT/Quattro and the Bentley Arnage was listed incorrectly. As a result of VW's comments, the production volume for the Audi TT/Quattro and the Bentley Arnage have been corrected and the final theft list has been revised. The Audi TT/Quattro previously ranked No. 136 with a theft rate of 1.4268 is now ranked No. 148 with a theft rate of 1.2575. The Bentley Arnage previously ranked No. 220 with a theft rate of 0.0000 is now ranked No. 221 with the theft rate unchanged.

VW informed the agency that the S4/Quattro ranked at No. 2 was incorrectly listed as the "24/Quattro." Because the S4 is a model within the A4 vehicle line, production and theft totals have been combined for the A4 vehicle line and the theft data has been revised accordingly. The Audi A4 is now ranked No. 110 with a theft rate of 1.8970. Additionally, because the S6 is a model within the A6 vehicle line, production and theft totals have been combined for the A6 vehicle line and the theft data has been revised accordingly. The Audi A6 vehicle line is now ranked No. 188 with a theft rate of 0.6303.

Further review of the final theft list revealed that the Acura Integra was erroneously listed. The Acura Integra was not produced in MY 2002. The correct name designation for the vehicle

previously ranked No. 87 (Integra) should be changed to the Acura RSX now ranked No. 88. The final theft list has been revised accordingly.

The following list represents NHTSA's final calculation of theft rates for all 2002 passenger motor vehicle lines. This list is intended to inform the public of calendar year 2002 motor

vehicle thefts of model year 2002 vehicles and does not have any effect on the obligations of regulated parties under 49 U.S.C. chapter 331, Theft Prevention.

## FINAL THEFT RATES OF MODEL YEAR 2002 PASSENGER MOTOR VEHICLES STOLEN IN CALENDAR YEAR 2002

Number	Manufacturer	Make/model (line)	Thefts 2002	Production (Mfr's) 2002	2002 theft rate (per 1,000 vehicles produced)

Fishing Capacity Reduction; Fishing Capacity Reduction Program for the Crab Species Covered by the Fishery Management Plan for the Bering Sea/ Aleutian Islands King and Tanner Crabs; Implementation of the Shark Finning Prohibition Act; Atlantic Highly Migratory Species; Fisheries of the Northeastern United States; Fisheries Off West Coast States and in the Western Pacific; Fisheries of the Exclusive Economic Zone Off Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

**SUMMARY:** NMFS publishes this final rule to reorganize, by redesignation, its fishing capacity reduction program (FCRP) regulations and FCRP fee system regulations. To accomplish this, it is also necessary to redesignate regulatory provisions implementing the Shark Finning Prohibition Act (Act). The redesignation involves changing subparts, renumbering regulatory provisions, and revising regulatory references. The substantive provisions are not changed in any way; only the old Code of Federal Regulations (CFR) unit numbers are redesignated with new CFR unit numbers. Also, one subpart title and one section title are modified. Several sections are reserved to ensure a logical organization. The intent of this rule is to improve understanding and ease of use of FCRP regulations, and to make additional sequential section numbers available for future FCRP regulations.

**DATES:** Effective September 1, 2004.

**FOR FURTHER INFORMATION CONTACT:** Robert Gorrell, Office of Sustainable Fisheries, NMFS headquarters, at 301-713-2341.

Background

FCRP Framework Regulations

NMFS published its framework regulations for fishing capacity reduction programs on May 18, 2000 (65 FR 31443) as a new Subpart L—Fishing Capacity Reduction under Part 600—Magnuson-Stevens Act Provisions. These regulations serve as a framework that may be used in developing future FCRPs for specific fisheries and include provisions for fee payment and collection in repaying reduction loans. The section numbering of these framework regulations begins with § 600.1000 and ends with § 600.1017. The subpart title “Subpart L—Fishing Capacity Reduction” is being renamed “Subpart L—Fishing Capacity Reduction Framework.” Also, “§ 600.1018” is being redesignated as “§ 600.1103” in a new subpart M containing specific fishery program regulations.
