The information collection consists of a one page essay with five questions inviting any rural community to submit a Community VISION Essay, which describes their community's "vision" of how to utilize broadband access to bring new, economic, educational, healthcare, and other opportunities and benefits to their residents. The selected communities will work with a team of experts from FCC and USDA. The team of experts will provide direct, hands-on assistance to the communities to achieve successful wireless broadband deployments and thus make their Community's VISION a reality. The team of experts will select the participants in the program from among the communities that apply. These communities will serve as models to help speed wireless broadband access to unserved or underserved rural communities in the United States.
