Agricultural Research Service

Notice of Intent To Grant Exclusive License; Correction

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of Intent To Grant Exclusive License; correction.

SUMMARY: The Agricultural Research Service published in the **Federal Register** of August 11, 2004, a Notice of Federal Invention Available for Licensing and Intent to Grant Exclusive License to Nutrition 21, Inc., of Purchase, New York, to U.S. Patent 6,689,383, "Chromium-Histidine Complexes as Nutrient Supplements." The notice was inadvertently published as a Notice of Availability and referenced the incorrect issue date for U.S. Patent 6,689,383, "Chromium-Histidine Complexes as Nutrient Supplements." The corrected Action is Notice of Intent to Grant Exclusive License, and the correct issue date for U.S. 6,689,383, "Chromium-Histidine Complexes as Nutrient Supplements" is February 10, 2004.

DATES: October 12, 2004.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, 5601 Sunnyside Avenue, Room 4-1174, Beltsville, Maryland 20705-5131.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology

Transfer at the Beltsville address given above; telephone: (301) 504-5989.

Michael D. Ruff,

Assistant Administrator.

Food Safety and Inspection Service

[Docket No. 04-013N]

Humane Handling and Slaughter Requirements and the Merits of a Systematic Approach To Meet Such Requirements

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: All livestock establishments are required to meet requirements in the Humane Methods of Slaughter Act (HMSA), Federal Meat Inspection Act (FMIA) and implementing regulations. FSIS believes a systematic approach is beneficial in meeting these requirements and through this notice is encouraging livestock slaughter establishments to use a systematic approach to humane handling and slaughter to best ensure that they meet the requirements of the HMSA, FMIA, and implementing regulations. With a systematic approach, establishments focus on treating livestock in such a manner as to minimize excitement, discomfort, and accidental injury the entire time they hold livestock in connection with slaughter.

FOR FURTHER INFORMATION CONTACT:

Lynn Dickey, Ph.D., Director, Regulations and Petitions Policy Staff, Office of Policy, Program and Employee Development, Food Safety and Inspection Service, Cotton Annex Building, 300 12th Street, SW., Room 112, Washington, DC 20250-3700; (202) 720-5627.

SUPPLEMENTARY INFORMATION:

The HMSA, the FMIA, and FSIS Regulations on Humane Handling and Slaughter of Livestock

The HMSA of 1978 (7 U.S.C. 1901 *et seq.*) requires that humane methods be used for handling and slaughtering livestock. The HMSA provides that two methods of slaughter and handling are humane. Under the first humane method, all livestock are rendered insensible to pain by a single blow or gunshot or an electrical, chemical, or other means that is rapid and effective, before being shackled, hoisted, thrown, cast, or cut. Under the second humane

method, slaughtering is in accordance with the ritual requirements of the Jewish faith or of any other religious faith that prescribes a method of slaughter whereby the animal suffers loss of consciousness by anemia of the brain caused by the simultaneous and instantaneous severance of the carotid arteries with a sharp instrument.

In the HMSA, Congress found "that the use of humane methods in the slaughter of livestock prevents needless suffering; results in safer and better working conditions for persons engaged in the slaughtering industry; brings about improvement of products and economies in slaughtering operations; and produces other benefits for producers, processors, and consumers which tend to expedite an orderly flow of livestock and livestock products in interstate and foreign commerce."

The HMSA is referenced in the FMIA (21 U.S.C. 603) and is implemented by FSIS humane handling and slaughter regulations found at 9 CFR part 313. The FMIA provides that, for the purposes of preventing inhumane slaughter of livestock, the Secretary of Agriculture will assign inspectors to examine and inspect the methods by which livestock are slaughtered and handled in connection with slaughter in slaughtering establishments subject to inspection (21 U.S.C. 603(b)). Therefore, establishments must meet the humane handling and slaughter requirements in the regulations the entire time they hold livestock in connection with slaughter.

The Reason FSIS is Issuing This Notice at This Time

FSIS is issuing this notice because there has been considerable congressional and public interest about the humane treatment of animals, and because the number of humane handling noncompliance incidents documented by FSIS in establishments has increased over the last three years.

In recent years, Congress has taken various actions to strengthen USDA's resources and to ensure that the agency enforces the humane handling and slaughter provisions of the HMSA and the FMIA. In 2001, Congress provided funds for the agency to enhance verification and enforcement of humane slaughter practices. In response, FSIS created the position of District Veterinary Medical Specialist (DVMS) in each of the FSIS district offices. The DVMSs are the primary contacts for all humane handling and slaughter issues, and they are the liaisons between the district offices and headquarters. They are responsible for on-site coordination of nationally prescribed humane slaughter procedures and verification of
