SUPPLEMENTARY INFORMATION: This Notice informs the public that the U.S. Department of Housing and Urban Development (HUD) has submitted to OMB, for emergency processing, a survey instrument to obtain information from faith-based and community organizations on their likelihood and success at applying for various funding programs. This Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice Also Lists the Following Information

Title of Proposal: Computation of Payments In Lieu of Taxes.
OMB Approval Number: 2577–0072.
Form Numbers: 52267.

Description of the Need for the Information and Its Proposed Use:
The collection captures specific financial data detailing the allowed payments in lieu of taxes to local governments in accordance with regulatory requirements. HUD collects information on the estimated property taxes that a public housing property would pay to local government if it were a taxable property. Local tax rates, property values, rent and utility costs are collected as components of the PILOT calculation in a formula to determine a public housing operating subsidy.

Frequency of Submission: Annually.

Revised Recovery Plan for the Paiute Cutthroat Trout (Oncorhynchus clarki seleniris)

AGENCY: Fish and Wildlife Service, Interior.
The Paiute cutthroat trout is native to the Carson River drainage of Humboldt-Carson in eastern Nevada. It is also known to occur in Lboyne National Forest, Alpine County, California. Hybridization with non-native salmonids is the primary threat to the species.

The original recovery plan for the Paiute cutthroat trout was published in 1985. This revised recovery plan incorporates recent research data and addresses the species’ current status, threats, distribution, and recovery needs. It also addresses the effects of recovery actions on the mountain yellow-legged frog (Rana muscosa) and the Yosemite toad (Bufo canorus), which occur within the Silver King Creek drainage as well as in the vicinity of the out-of-basin population sites. This plan identifies actions to maintain ecosystem integrity as well as recover the Paiute cutthroat trout.

The revised recovery plan includes conservation measures designed to ensure that self-sustaining populations of Paiute cutthroat trout will once again occupy its historic range. Specific recovery actions focus on removing non-native salmonids and establishing a viable population in its historic range. The plan also identifies the need to protect pure populations which exist outside of the historic range. The ultimate goal of this revised recovery plan is to delist the Paiute cutthroat trout by implementing a variety of measures to attain the following criteria: (1) All non-native salmonids are removed from Silver King Creek and its tributaries downstream of Llewelyn Falls to fish barriers in Silver King Canyon; (2) A viable population of Paiute cutthroat trout occupies all historic habitat in Silver King Creek and its tributaries downstream of Llewelyn Falls to fish barriers in Silver King Canyon; (3) Paiute cutthroat trout habitat is maintained in all occupied streams; (4) The refuge populations in Corral and Coyote Creeks, Silver King Creek and tributaries above Llewelyn Falls, as well as out-of-basin populations are maintained as refuge and are secured from the introduction of other salmonid species; and (5) A long-term conservation plan and conservation agreement are developed, which will be the guiding management documents once Paiute cutthroat trout are delisted.
