

# Proposed Rules

Federal Register

Vol. 69, No. 178

Wednesday, September 15, 2004

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 136

[FRL-7813-5]

#### Potential Stakeholder Process for Detection and Quantitation Procedures

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed rule.

**SUMMARY:** This document announces EPA's intent to explore the feasibility and design of a process through which stakeholders could provide their ideas and recommendations on procedures for the development of detection and quantitation limits and uses of these limits in Clean Water Act (CWA) programs.

**FOR FURTHER INFORMATION CONTACT:** Marion Kelly: Engineering and Analysis Division (4303T); Office of Science and Technology; Office of Water; U.S. Environmental Protection Agency; Ariel Rios Building; 1200 Pennsylvania Avenue NW., Washington, DC 20460, or call (202) 566-1045 or E-mail at [kelly.marion@epa.gov](mailto:kelly.marion@epa.gov).

**SUPPLEMENTARY INFORMATION:** EPA approves analytical methods (*i.e.*, test procedures) used for monitoring and reporting chemical pollutants under the CWA. EPA's analytical methods specify detection limits to determine if a pollutant is present. Quantitation limits describe the concentration of a pollutant that can be measured with a known level of confidence. These values are often used as reporting and compliance limits by the States, Tribes and EPA Regions that administer and enforce permit limits on direct discharges into water. These values are also often used by States and localities in administering and enforcing pretreatment programs for indirect discharges.

EPA published two documents in the **Federal Register** on this topic on March 12, 2003, for public comment. One document announced the availability of EPA's assessment of detection and

quantitation procedures that are applied to analytical methods used under the CWA (68 FR 11791). The second document proposed revisions to the detection and quantitation definitions and procedures specified at 40 CFR part 136 (68 FR 11770). The proposed regulatory revisions were based largely on the results of the assessment and on comments from users of the method detection limit procedure. Further analysis of some of the public comments, prompted EPA to explore the feasibility and design of a stakeholder process to obtain additional stakeholder input on procedures for the development of detection and quantitation limits and uses of these limits in CWA programs.

The Agency is beginning the process to engage a neutral third party to conduct a situation assessment to determine whether a stakeholder process should go forward and, if so, how that process should be designed. During a situation assessment, the neutral third party talks with affected stakeholders about their ideas for the design of multi-party discussions on the policy and technical issues. As a result of these discussions, EPA expects the neutral third party to make recommendations about the feasibility and design of a stakeholder process, including format, schedule, and topics for discussion. If the neutral third party recommends that a stakeholder process is feasible, EPA will, as soon as possible, implement a process during which stakeholders could provide their ideas and recommendations on procedures for the development of detection and quantitation limits and uses of these limits in CWA programs. We estimate that the neutral third party's recommendations will probably be available in November 2004.

EPA plans to post the final situation assessment report on the EPA Web site at <http://www.epa.gov/waterscience/methods/det/index.html>

Dated: September 9, 2004.

**Benjamin H. Grumbles,**

*Acting Assistant Administrator for Water.*

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 73

[DA 04-2859; MB Docket No. 04-348, RM-10718; MB Docket No. 04-349, RM-10827; MB Docket No. 04-350, RM-10815; MB Docket No. 04-351, RM-10828]

#### Radio Broadcasting Services; Cross Plains, TX; Fernley, NV; Oroville, CA and Pittsburg, OK

**AGENCY:** Federal Communications Commission.

**ACTION:** Proposed rule.

**SUMMARY:** This document proposes four new allotments in Cross Plains, Texas, Fernley, Nevada, Oroville, California and Pittsburg, Oklahoma. The Audio Division requests comment on a petition filed by Charles Crawford proposing the allotment of Channel 294A at Cross Plains, Texas, as the community's first local aural transmission service. Channel 294A can be allotted to Cross Plains in compliance with the Commission's minimum distance separation requirements with a site restriction of 14 kilometers (8.7 miles) west to avoid a short-spacing to the license sites of FM Stations KKHR, Channel 292C2, Abilene, Texas and KKDL, Channel 294C, Muenster, Texas. The reference coordinates for Channel 294A at Cross Plains are 32-06-48 NL and 99-18-45 WL. See Supplementary Information, *infra*.

**DATES:** Comments must be filed on or before October 25, 2004, and reply comments on or before November 9, 2004.

**ADDRESSES:** Federal Communications Commission, 445 Twelfth Street, SW., Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, his counsel, or consultant, as follows: Charles Crawford, 4553 Bordeaux Avenue, Dallas, TX 75205 and Linda A. Davidson, 2134 Oak Street, Unit C, Santa Monica, California 90405.

**FOR FURTHER INFORMATION CONTACT:** Rolanda F. Smith, Media Bureau, (202) 418-2180.

**SUPPLEMENTARY INFORMATION:** This is a synopsis of the Commission's Notice of Proposed Rule Making, MB Docket Nos. 04-348, 04-349, 04-350, 04-351, adopted September, 2004 and released September, 2004. The full text of this
