BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission

September 9, 2004.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before October 18, 2004. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all Paperwork Reduction Act (PRA) comments to Judith B. Herman, Federal Communications Commission, Room 1-C804, 445 12th Street, SW., DC 20554 or via the Internet to *Judith-B.Herman@fcc.gov*.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s), contact Judith

B. Herman at 202-418-0214 or via the Internet at *Judith-B.Herman@fcc.gov*.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0360.

Title: Section 80.409, Station Logs.

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, state, local or tribal government.

Number of Respondents: 24,660.

Estimated Time Per Response: 27.3—95 hours.

Frequency of Response: Recordkeeping requirement.

Total Annual Burden: 677,380 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Needs and Uses: The Commission is revising this information collection to consolidate two recordkeeping requirements into one comprehensive collection. Both information collections were under 47 CFR 80.409 (approved by OMB under OMB Control Numbers 3060-0360 and 3060-0364). The Commission will retain OMB Control Number 3060-0360 as the active control number.

The recordkeeping requirements in Section 80.409 are necessary to document the operation and public correspondence service of public coast radiotelegraph, public coast radiotelephone stations and Alaska-public fixed stations, ship radiotelegraph, ship radiotelephone and applicable radiotelephone including the logging of distress and safety calls where applicable.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

Audit of Operational Status of Licenses in the Paging and Radiotelephone Service and 929-930 MHz Band on Exclusive Channels

AGENCY: Federal Communications Commission.

ACTION: Notice; correction.

SUMMARY: The Federal Communications Commission (Commission) published a document in the *Federal Register* on September 8, 2004, announcing an audit of the operational status of stations authorized in the paging and radiotelephone service (part 22) and

stations authorized on 929-930 MHz private carrier paging exclusive channels (part 90) which encourages licensees to verify the mailing address for each license held and to register with the Commission Registration System (CORES).

FOR FURTHER INFORMATION CONTACT:

Denise D. Walter, Mobility Division, at 202-418-0620.

Correction

1. In the *Federal Register* of September 8, 2004, in FR Doc. 04-20361, on page 54290, in the third column, correct the "proceeding title" to read: Audit of Operational Status of Licenses in the Paging and Radiotelephone Service and 929-930 MHz Band on Exclusive Channels

2. In the *Federal Register* of September 8, 2004, in FR Doc. 04-20361, on page 54290, in the first paragraph, correct the "Summary" text to read:

SUMMARY: In this document the Wireless Telecommunications Bureau (Bureau) announces a license audit of the operational status of all site-specific licenses operating under part 22, Paging and Radiotelephone Service, with a "CD" radio service code and all site-specific licenses operating in the 929-930 MHz band on exclusive channels, part 90, with a "GS" radio service code. Licensees are asked to verify their mailing address on record in the Universal Licensing System for each license held and, where appropriate, update the information. Licensees are also asked to verify they have registered with the Commission Registration System (CORES) and associated their FCC Registration Number (FRN) with each license held. The audit is scheduled to begin the week of September 27, 2004. Licensees will be required to respond to the audit electronically, via the internet, within forty-five (45) calendar days from the date on the audit letter.

Dated: September 10, 2004.

Linda Chang,

Associate Chief, Mobility Division.

BILLING CODE 6712-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Solicitation of Written Comments on Proposed Definition of Bioactive Food Components

AGENCY: Office of Public Health and Science, Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: The Office of Disease Prevention and Health Promotion (ODPHP), Office of Public Health and Science, Department of Health and Human Services (HHS), acting on behalf of an ad hoc Federal working group, is soliciting written comments on a proposed definition of "bioactive food components."

DATES: Submit written or electronic comments by November 1, 2004.

ADDRESSES: Submit a single copy of electronic comments or two paper copies of any mailed comments to Leila G. Saldanha at saldanhl@mail.nih.gov or Department of Health and Human Services, c/o Office of Dietary Supplements, 6100 Executive Blvd., Rm 3B01, MSC 7517, Bethesda, MD 20892-7517.

FOR FURTHER INFORMATION CONTACT: Leila G. Saldanha, Department of Health and Human Services, 6100 Executive Blvd., Rm 3B01, MSC 7517, Bethesda, MD 20892-7517, Phone: 301-496-0168, Fax: 301-480-1845, e-mail: saldanhl@mail.nih.gov.

SUPPLEMENTARY INFORMATION:

Background: Foods provide numerous chemical constituents that may influence health and disease prevention, in addition to those usually characterized as essential nutrients. The physiological implications of these food components have been the subject of recent scientific inquiries and publications. Widespread scientific, governmental, and consumer attention to these components, referred to here as "bioactive food components," has sparked an interest about how they should be defined and how best to evaluate their significance in promoting health and disease prevention.

Bioactive food components exist not only in commonly consumed foods but also as ingredients in fortified foods and dietary supplements. Bioactive food components may have multiple sites of action, may interact with one or more dietary constituents, and may act directly or indirectly to produce the functional outcome. Some examples of these components include lycopene, long-chain omega-3 fatty acids, epigallocatechin gallate (EGCG), isoflavones, sulphorophane, and resveratrol. Food sources of these components include, respectively, tomatoes, fatty fish, green tea, soybeans, broccoli, and red grapes, but other foods may be significant sources of bioactive food components.

An ad hoc Federal working group that includes representatives from the Departments of Health and Human Services (HHS), Defense, and

Agriculture, and agencies within these departments such as the National Institutes of Health, Centers for Disease Control and Prevention, and Food and Drug Administration, is interested in establishing a definition for "bioactive food components" as a first step toward developing approaches that might be used to assess their health effects. Currently, there is no generally accepted definition about what should be classified as a bioactive food component. Further, there are no generally accepted approaches for evaluating the health effects resulting from consuming these components. Establishing a definition for bioactive food components may help in guiding and encouraging future research with these components. An approach to assess the health effects of bioactive food components may need to take into account the complex nature of this category of components. In addition, it may provide science-based information to help guide public health policy on how Americans may choose diets that promote good health.

Written Comments: By this notice, ODPHP, on behalf of the ad hoc Federal working group, is soliciting submission of written comments on the following proposed definition of "bioactive food components:"

Bioactive food components are constituents in foods or dietary supplements, other than those needed to meet basic human nutritional needs, that are responsible for changes in health status.

In making comments on the proposed definition, please provide the rationale for your comments. Comments are specifically requested on the following questions:

- (1) What categories/classes of compounds should be considered as bioactive food components?
- (2) What categories/classes of compounds should *not* be considered as bioactive food components? How should the definition be modified to reflect exclusion of these compounds?
- (3) Should essential nutrients be included as bioactive food components?
- (4) Should synthetically derived components used in fortified foods and dietary supplements be considered under this definition?

Written comments received in response to this notice will be reviewed by the ad hoc Federal working group and considered in refining the proposed definition of "bioactive food components" and in future plans involving the use of this definition.

(Authority: 42 U.S.C. 300u.)

Dated: September 10, 2004.

Cristina V. Beato,

*Acting Assistant Secretary for Health,
Department of Health and Human Services.*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

**[Program Announcement 04064
(Supplemental)]**

ADAPT: Adopting and Demonstrating the Adaptation of Prevention Techniques Amendment

A notice announcing the availability of supplemental fiscal year (FY) 2004 funds for a cooperative agreement entitled, "ADAPT: Adopting and Demonstrating the Adaptation of Prevention Techniques" was published in the **Federal Register** Monday, August 23, 2004, volume 69, number 162, pages 51847-51851. The notice is amended as follows:

- On page 51849, column two, the Funding Restrictions section, please note funds provided by the ADAPT supplement can only be used for the adaptation of the intervention being implemented with the original PA 04064 funding. Adaptation activities include formative activities, monitoring and evaluation of the processes used to adapt the intervention, and evaluation of the adapted intervention and not for implementation of the intervention.
- On page 51847, column two, the Activities section, please note preference for ADAPT supplemental funding will no longer be given to Many Men, Many Voices. The following interventions will be equally considered for ADAPT supplemental funding:
 1. Community Promise
 2. Healthy Relationships
 3. Holistic Harm Reduction
 4. Many Men, Many Voices
 5. Mpowerment
 6. Partnership for Health
 7. Popular Opinion Leader
 8. Real AIDS Prevention Project
 9. Safety Counts
 10. SISTA
 11. Street Smart
 12. Teens Link to Care
 13. VOICES/VOCES
- On page 51848, column one, Eligibility section, please note the sample size listed in letter *b* should be amended. The sample size should be similar to the original study. However, when this is not possible, the applicants who propose the largest sample sizes
