SUMMARY: The EPA is proposing to approve the State Implementation Plan (SIP) revision submitted by the North Carolina Department of Environment and Natural Resources on June 4, 2004. This SIP revision satisfies the requirement of the Clean Air Act (CAA) for the second 10-year update for the Raleigh/Durham area (Durham and Wake Counties and a portion of Granville County) and Greensboro/Winston-Salem/High Point area (Davidson, Forsyth, and Guilford Counties and a portion of Davie County) 1-hour ozone maintenance plans.

In the Final Rules section of this **Federal Register**, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no significant, material, and adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

Statutory Authority: 33 U.S.C. 1251 *et seq.*; 33 U.S.C. 2720; E.O. 12777 (October 18, 1991), 3 CFR, 1991 Comp., p. 351

Background: On July 17, 2002, EPA published a final rule amending the Oil Pollution Prevention regulation (40 CFR part 112) promulgated under the authority of the Clean Water Act. This rule included requirements for Spill Prevention, Control, and Countermeasure (SPCC) Plans, and for Facility Response Plans (FRPs). It also included new subparts outlining the requirements for various classes of oil; revising the applicability of the regulation; amending the requirements for completing SPCC Plans; and made other modifications. (See 67 FR 47042.) The rule was effective on August 16, 2002. The compliance dates in 40 CFR 112.3(a) and (b) have been extended several times. See 69 FR 48794, August 11, 2004 for further discussion on the compliance extensions.

Today's NODA: EPA is considering an initiative that would provide more focused regulation for certain facilities. To assist the Agency in this effort, we are making available to the public a number of documents for review and comment to help inform us as to what measures, if any, we should consider. We believe that as long as protection of human health and the environment is maintained, we should consider alternatives/options that accomplish the stated objectives of the applicable statutes and minimize impacts of the requirement. The documents being made available today for comment describe possible streamlined alternatives that could replace parts of existing regulations for certain facilities. Because this approach may have merit, we are very interested in your comments. Specifically, we are interested in receiving any evidence, including data and analyses, related to

claims made within the documents. In order for the data you submit to be considered in making a determination, the data should be collected, transported, and analyzed under the proper quality assurance and quality control protocols as described at <http://www.epa.gov/quality/>.

Data Available for Comment: The documents available for comment today can be found at <http://www.epa.gov/oilspill> under the title "Notice of Data Availability for Certain Facilities" in the EDOCKET index at <http://www.epa.gov/edocket>. These documents include relevant portions of a June 10, 2004 letter from the U.S. Small Business Administration's Office of Advocacy to Thomas P. Dunne, Acting Assistant Administrator for the Office of Solid Waste and Emergency Response of the U.S. Environmental Protection Agency; relevant sections of a background document, *Proposed Reforms to the SPCC Professional Engineer Certification Requirement: Designing a More Cost Effective Approach for Small Facilities*; and additional documents submitted by members of the agricultural industry and other industry stakeholders.

Request for Comments: We believe that affected parties should be given an opportunity to participate in the Agency's process of considering whether possible streamlined approaches are appropriate. We are especially interested in data relating to the regulatory approaches described in the documents available for your review today. We are listing the following areas, which are discussed in the documents available to you today, as examples of the kinds of data we request be submitted.

- 1—Data to support development of criteria (e.g. facility oil capacity, activity, etc.) to define a threshold for streamlined requirements for "certain facilities."
- 2—Spill rates for facilities handling oil in various amounts.
- 3—Cost differences for preparation and professional engineer certification for the SPCC Plan related to size of facility or amount of oil handled.
- 4—SPCC compliance rates for facilities handling oil in various amounts.

The Agency is soliciting comments only on the data referenced in this NODA; we are not soliciting comments in this NODA on any other topic. The data may be found at Docket No. OPA-2004-0007 (<http://www.epa.gov/edocket>), and on our Web site (i.e., <http://www.epa.gov/oilspill>).

Dated: August 30, 2004.

Thomas P. Dunne,

Acting Assistant Administrator, Office of Solid Waste and Emergency Response.
