## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-184]

### National Institute of Standards and Technology (NIST); Notice of Acceptance for Docketing of the Application and Notice of Opportunity for Hearing Regarding Renewal of the National Bureau of Standards Reactor (The NBSR) Facility Operating License No. TR-5 for an Additional 20-Year Period

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering an application for the renewal of Operating License No. TR-5, which authorizes the National Institute of Standards and Technology (NIST), to operate the National Bureau of Standards Reactor (NBSR) at 20 megawatts thermal power for an additional 20-year period beyond the period specified in the current operating license. The current operating license for the NBSR (TR-5) expired on May 16, 2004.

On April 9, 2004, the Commission's staff received applications from NIST filed pursuant to 10 CFR 50.51(a), to renew the Operating License No. TR-5 for the NBSR. A Notice of Receipt and Availability of the license renewal application, "National Institute of Standards and Technology (NIST) Notice of Receipt and Availability of Application for Renewal of the National Institute of Standards and Technology Reactor (the NBSR) Facility Operating License No. TR-5 for an Additional 20-year Period," was published in the **Federal Register** on May 12, 2004 (69 FR 26414). Because the license renewal application was timely filed under 10 CFR 2.109, the license will not be deemed to have expired until the license renewal application has been finally determined.

The Commission's staff has determined that NIST has submitted sufficient information in accordance with 10 CFR 50.33 and 50.34 that is acceptable for docketing. The current Docket No. 50-184 for Operating License No. TR-5, will be retained. The docketing of the renewal application does not preclude requesting additional information as the review proceeds, nor does it predict whether the Commission will grant or deny the application.

Before issuance of the requested renewed license, the NRC will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. Additionally, in accordance with 10 CFR 51.20(b)(2), the NRC will prepare an environmental
