NUCLEAR REGULATORY COMMISSION

[Docket No. 50-184]

National Institute of Standards and Technology (NIST); Notice of Acceptance for Docketing of the Application and Notice of Opportunity for Hearing Regarding Renewal of the National Bureau of Standards Reactor (The NBSR) Facility Operating License No. TR-5 for an Additional 20-Year Period

The U.S. Nuclear Regulatory
Commission (NRC or the Commission)
is considering an application for the
renewal of Operating License No. TR-5,
which authorizes the National Institute
of Standards and Technology (NIST), to
operate the National Bureau of
Standards Reactor (NBSR) at 20
megawatts thermal power for an
additional 20-year period beyond the
period specified in the current operating
license. The current operating license
for the NBSR (TR-5) expired on May 16,
2004.

On April 9, 2004, the Commission's
staff received applications from NIST
filed pursuant to 10 CFR 50.51(a), to
renew the Operating License No. TR-5
for the NBSR. A Notice of Receipt and
Availability of the license renewal
application, "National Institute of
Standards and Technology (NIST)
Notice of Receipt and Availability of
Application for Renewal of the National
Institute of Standards and Technology
Reactor (the NBSR) Facility Operating
License No. TR-5 for an Additional 20-
year Period," was published in the
Federal Register on May 12, 2004 (69
FR 26414). Because the license renewal
application was timely filed under 10
CFR 2.109, the license will not be
deemed to have expired until the
license renewal application has been
finally determined.

The Commission's staff has
determined that NIST has submitted
sufficient information in accordance
with 10 CFR 50.33 and 50.34 that is
acceptable for docketing. The current
Docket No. 50-184 for Operating
License No. TR-5, will be retained. The
docketing of the renewal application
does not preclude requesting additional
information as the review proceeds, nor
does it predict whether the Commission
will grant or deny the application.

Before issuance of the requested
renewed license, the NRC will have
made the findings required by the
Atomic Energy Act of 1954, as amended
(the Act), and the Commission's rules
and regulations. Additionally, in
accordance with 10 CFR 51.20(b)(2), the
NRC will prepare an environmental
