

implementation of the TMDL or assimilative capacity determination.

The rule has four principal parts. Section A addresses the scope of the rule—both the pollutants and the entities intended to be regulated. Section B sets forth procedures for submission, review, implementation, and continuation of Pollutant Minimization Plans (“PMPs” or “plans”) required under the rule, including the relationship of the rule to the NPDES permit program. Section C lists the elements required to be included in a PMP, and Section D sets forth the requirement that dischargers submit a report annually, quantifying changes in pollutant loadings since initiation of the PMP and describing measures under way or completed to reduce loadings. Additional sections include a waiver provision and a provision for the development of guidance to assist dischargers in developing PMPs under the rule.

Scope of the Proposed Rule. The scope of the proposed rule is limited to toxic chemicals listed in Section A.1 of the rule. The proposed rule lists one pollutant—PCBs—for which the EPA issued a TMDL for the Delaware Estuary on December 15, 2003. Additional pollutants may be added to the rule only through notice and comment rulemaking.

Classes of dischargers or individual dischargers proposed to be subject to the rule may be added by amendment or by a directive of the Commission’s Executive Director, upon approval by the Commission. Two classes of PCB dischargers are initially proposed to be included: those listed in Group 1 of Tables 3–2 through 3–5 of Appendix 3 of the document, U.S. Environmental Protection Agency Regions II and III, Total Maximum Daily Loads for Polychlorinated Biphenyls (PCBs) for Zones 2–5 of the Tidal Delaware River (December 15, 2003); and those listed in Group 2 of the same tables in the event that the presence of PCB congeners is confirmed through monitoring in accordance with the requirements set forth in Appendix 3 of the same document.

Procedures for Submission, Review, Implementation and Continuation of PMPs. The proposed rule requires dischargers to submit a PMP to the Commission and the permitting agency, if any, within three months of publication of a final rule or issuance of a directive by the Executive Director. The Commission staff, in consultation with the permitting agency staff (if applicable), will review each PMP for completeness, and the Executive Director will issue a completeness

determination, either confirming that a PMP contains all components required by the rule, or identifying deficiencies in the PMP. Where a deficiency is identified, a discharger has 30 days to submit a revised PMP reflecting a good faith effort to cure the deficiency. The rule sets forth procedures for subsequent revisions if necessary, and allows the Executive Director to seek penalties against a discharger for repeated failure to comply, or grant a waiver from a requirement of the rule for good cause shown. The discharger must commence implementation of its plan as submitted within 60 days of receipt of a determination of completeness.

Upon issuance of a final new or renewed NPDES permit by EPA or a member state after the imposition of a PMP requirement under the proposed rule, the permit supersedes any provisions of the PMP that relate to the NPDES-permitted discharge.

PMPs for point source discharges will receive a thorough substantive review at the time of NPDES permit issuance or reissuance. Due to limited agency resources, earlier substantive review of PMPs by the Commission or the member states is authorized but not required. The rule provides that if the Commission determines at any time that a PMP is not likely to achieve the maximum practicable reduction of pollutant discharges to the air, soil, or water, it may require the discharger to submit a revised PMP to more aggressively reduce pollutant loading.

The initial term of the PMP is to be five years. The term of any PMP that is not superseded by a NPDES permit within five years may be extended by the Executive Director, following a review by the Commission staff in consultation with the staff of the appropriate state environmental agency.

Plan Elements. Interested parties are referred to the text of the rule for the required elements of a PMP. Notably, these elements include strategies for tracking down unknown sources of the pollutant, as well as for minimizing releases of the pollutant where sources are found. Plans also must include a description of the procedures to be used to measure, demonstrate and report progress in reducing potential and actual discharges of the pollutant, including annual sampling and analysis of discharges using a prescribed analytical method if one is listed in the rule. In the case of PCBs, dischargers are required to measure loadings annually using EPA Method 1668, Revision A. Dischargers are encouraged to use less complex and expensive analytical methods where possible for purposes of

screening or identifying pollutant sources.

Annual Report. Annual sampling and reporting using a uniform method are required in order for dischargers and regulators to determine the effectiveness of a PMP in reducing pollutant loadings to a waterway.

DATES: The public hearing will be held on October 27, 2004 at 11 a.m. as part of the Commission’s regularly scheduled business meeting. The hearing will end 60 to 90 minutes later, at the discretion of the Commission chair.
