Notice Pursuant to the National Cooperative Research and Production Act of 1993—Sheet Metal and Air Conditioning Contractors' National Association

Notice is hereby given that, on August 18, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("Act"), the Sheet Metal and Air Conditioning Contractors' National Association (SMACNA) has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: Sheet Metal and Air Conditioning Contractors' National Association (SMACNA), Chantilly, VA. The nature and scope of SMACNA's standards development activities are to promulgate industry standards to the general public and to initiate, promote and document studies directed toward the solution of present and future problems in the heating, ventilation and air conditioning (HVAC) industry and all facets of the sheet metal industry.

Additional information concerning SMACNA may be obtained from Sue Baker at (703) 803-2980.

Dorothy B. Fountain,

Deputy Director of Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—the Society for Biomolecular Screening, Inc. ("SBS")

Notice is hereby given that, on September 1, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), The Society for Biomolecular Screening, Inc. ("SBS") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: The Society for Biomolecular Screening, Inc. Danbury, CT. The nature and scope of SBS' standard development activities are: Many science-based industries have implemented a High Throughput Screening (HTS) approach for discovery activities. HTS requires that automated devices and full robotic systems be used for this work. These devices and systems cost from tens of thousands of dollars to millions of dollars. The basic tool for this work is the microtiter plate (MTP) and as such, it is economically critical that these devices/systems work in a seamless manner with this tool as supplied by different manufacturers. However, each manufacturer had originally developed MTPs with slightly different dimensions and features to the extent that these plates performed poorly with automation. Laboratory users found it frustrating to try to use different plates with their equipment and often experienced significant financial losses when doing so. Manufacturers of automated devices tried to build in features that allowed for defining different plates from different manufacturers but there was only so much variation that could be accommodated and these changes were driving costs upwards. In 1995, The Society for Biomolecular Screening, Inc. formed a working group that brought together all of the interested parties, (manufacturers of MTPs, automated device manufacturers and users) to establish standards for microtiter plates

that would provide reliable use with all automated equipment and robotics. These standards need to address the various densities of the MTP including 96, 384, and 1536 since it would be expected that the same equipment could work with various formats but not necessarily all formats to contains costs.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Tree Care Industry Association ("TCIA")

Notice is hereby given that, on September 8, 2004, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Tree Care Industry Association ("TCIA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the name and principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is Tree Care Industry Association, Inc., Manchester, NH. The nature and scope of the TCIA's standards development activities are to serve as the secretariat and SDO for the American National Standards Institute (ANSI) A300 standards for tree, shrub, and other woody plant maintenance operations. The ANSI-accredited Standards Committee (ASC) A300 is the committee that writes the standards. TCIA currently has developed four performance standards addressing tree, shrub, and other woody plant maintenance operations: ANSI A300 Part 1-2001 Pruning; ANSI A300 Part-2004 Fertilization; ANSI A300 Part 3-2000 Support Systems; and ANSI A300 Part 4-2002 Lightning Protection Systems. TCIA also has three standards in development: BSR A300 Part 5-200x Management of Trees and Shrubs during Site Planning, Site Development, and Construction; BSR A300 Part 6-200x
