A limited number of paper copies will be available from the EPA's National Service Center for Environmental Publications (NSCEP), P.O. Box 42419, Cincinnati, OH 45242; telephone: 1-800-490-9198 or 513-489-8190; facsimile: 513-489-8695. FOR FURTHER INFORMATION CONTACT: For technical information, contact Dr. William P. Wood, Executive Director, Risk Assessment Forum, National Center for Environmental Assessment, Office of Research and Development; telephone: (202) 564-3361; facsimile: (202) 565-0062; or e-mail: risk_forum@epa.gov.

SUPPLEMENTARY INFORMATION: EPA has recognized the need for consistent application of methods and data to metals risk assessment in consideration of the unique properties of metals. Early in 2002, the Agency's Science Policy Council initiated the development a framework to assess the risks of metals to humans and the environment. An Agency Action Plan was developed and reviewed by EPA's Science Advisory Board (SAB) in September 2002. The SAB emphasized the importance of focusing on the unique properties of metals as they relate to environmental chemistry, bioavailability, bioaccumulation, exposure, and toxicity. The SAB also emphasized the importance of engaging the outside community so as to contribute to the knowledge base the Agency would draw from in developing guidance on the risk assessment of metals.

To inform the consideration of metals properties, and to engage the external scientific community, the Agency commissioned external experts to lead the development of a series of issue papers. (Some individual EPA experts contributed specific discussions on topic(s) for which he or she has scientific expertise or knowledge of current Agency practice.) A public comment period was held on the draft

papers from September 22 through November 7, 2003, wherein comments were collected utilizing the Agency's on-line commenting system (E-Docket). Additionally, comment was received via a public meeting held October 28, 2003, in Washington, DC (comments remain available for viewing at www.epa.gov/edocket, Docket Number OAR-2003-0192.) Comments were requested on technical issues including the level of detail in the papers, the chemical, biological and physical processes addressed or omitted, models and approaches that might reduce uncertainty, and other considerations that would improve the utility of the papers to the development of the framework. To finalize the papers, authors were directed to EPA's E-Docket to review and consider public comments received. The final papers reflect the authors responses to scientific comments received during the public comment period. Therefore, the views expressed are those of the authors and do not necessarily reflect the views or policies of the EPA and should not be construed as implying EPA consent or endorsement.

Having engaged the external community to broaden our knowledge base, the Agency is working to develop a framework for metals risk assessment. The framework will be provided for public comment, and SAB review.

OMB Control Number: 3060-0027.

Title: Application for Construction Permit for Commercial Broadcast Station, FCC Form 301.

Form Number: FCC 301.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions.

Number of Respondents: 3,247.
Estimated Hours per Response: 2 to 4 hours.

Frequency of Response: On occasion requirements; Third party disclosure.

Total Annual Burden: 8,380 hours.

Total Annual Cost: \$44,630,924.00.

Privacy Impact Assessment: No impact(s).

Needs and Uses: FCC Form 301 is used to apply for authority to construct a new commercial AM, FM, or TV broadcast station, or to make changes in existing facilities of such a station. In addition, FM licensees or permittees may request, by application on FCC Form 301, upgrades on adjacent and co-channels, modifications to adjacent channels of the same class and downgrades to adjacent channels without first submitting a petition for rulemaking. All applicants using this one-step process must demonstrate that a suitable site exists which would comply with allotment standards with respect to minimum distance separation and city-grade coverage and which would be suitable for tower construction. To receive authorization for commencement of Digital Television ("DTV") operation, commercial broadcast licensees must file FCC Form 301 for a construction permit. This application may be filed anytime after receiving the initial DTV allotment but must be filed before mid-point in a particular applicant's required construction period. The Commission will consider these applications as minor changes in facilities. Applications will not have to supply full legal or financial qualification information.

On June 24, 2004, the U. S. Court of Appeals for the Third Circuit (the "Court") issued an Opinion and Judgment ("*Remand Order*") in which it upheld certain aspects of the new Commission's ownership rules adopted on June 2, 2003 (See 18 FCC Rcd 13620 (2003)), specifically those dealing with local radio ownership, while requiring further explanation for all other aspects of the new rules. The Court stated that its prior stay of all the new rules would remain in effect pending the outcome of the remand proceeding. The Commission filed a petition for rehearing requesting that the Court lift the stay partially—*i.e.*, with respect to the radio ownership rules which the Court's *Remand Order* upheld. In the *Rehearing Order*, the Court granted the petition, thus partially lifting the stay. As a result of the *Rehearing Order*, the new radio ownership rules took effect September 3, 2004.
