Title: Evaluation of PrintSTEP (Renewal).

Abstract: Information will be collected for the evaluation of the PrintSTEP pilot program in New Hampshire and St. Louis, Missouri. PrintSTEP stands for "Printers Simplified Total Environmental Partnership" and is the first simplified program for managing the various environmental regulatory requirements for printers. PrintSTEP's two-year pilot has four features: operational flexibility, incentives for and assistance with

pollution prevention activities, regulatory simplification, and public participation. The evaluation will determine the extent to which the goals of the pilot program are met. These goals are: enhanced environmental protection; increased use of pollution prevention practices; simplified regulatory process for printers; improved efficiency of administration of state agencies; enhanced public involvement; participants realize benefits and are motivated to participate in PrintSTEP; and cost effectiveness for all stakeholders. The evaluation encompasses a baseline survey, mid-point review, and end-of-pilot survey. The baseline survey and mid-point review will have been completed by the time the current ICR expires. So, the proposed ICR is necessary for the end-of-pilot survey of the 56 printers voluntarily participating in the pilot. There are also 2 state agencies implementing the pilot which will assist the participating printers, provide supplementary data to EPA and answer some end-of-pilot survey questions directed towards the states. The lessons learned from the pilot will be shared with states interested in establishing PrintSTEP-like programs and may be translated into a guide for developing, implementing and evaluating pilot programs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: The affected entities are the 56 printing facilities which are participating in the PrintSTEP pilot in New Hampshire and St. Louis, Missouri, as well as the 2 State agencies implementing the pilots.

Estimated Number of Respondents: 58.

Frequency of Response: One-time response at the end of the pilot (including response to telephone survey and submission of written information).

Estimated Total Annual Hour Burden: 143 hours.

Estimated Total Annual Cost: \$5,000, includes \$0 annual capital/startup and SO&M costs.

Changes in the Estimates: There is a decrease of 1,857 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. Originally, the evaluation approach was going to include the use of a control group of printers. It was determined that this approach was not feasible. The decrease in hours is the result of not using a control group, as well as knowing the final number of printers who will be subject to the evaluation.
