SUPPLEMENTARY INFORMATION:

I. Background

When rock bursts occur in an underground mine, they pose a serious threat to the safety of miners in the area affected by the burst. These bursts may reasonably be expected to result in the entrapment, serious physical harm, or death, of miners. Recently developed mining technology now permits mine operators to monitor rock stresses, which helps predict an impending burst. These predictions can be used by a mine operator to move miners to safer locations and to establish areas that need relief drilling. Title 30, Section 57.3461 requires operators of underground metal and nonmetal mines to develop a rock burst control plan within 90 days after a rock burst has occurred.

II. Desired Focus of Comments

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection requirement related to the Rock Burst Control Plans. MSHA is particularly interested in comments that:

* Evaluate whether the proposed collection of information is necessary for the proper performance of MSHA's functions, including whether the information has practical utility;

* Evaluate the accuracy of MSHA's estimate of the burden of the proposed collection of information, including the

validity of the methodology and assumptions used;

* Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

* Address the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, (e.g., permitting electronic submissions of responses) to minimize the burden of the collection of information on those who are to respond.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **ADDRESSES** section of this notice or viewed on the Internet by accessing the MSHA home page (<http://www.msha.gov>) and then choosing "Statutory and Regulatory Information" and "Federal Register Documents."

III. Current Actions

This information collection needs to be extended to protect miners from entrapment, serious physical harm, or death, in metal and nonmetal underground mines with a history of rock bursts.

SECURITIES AND EXCHANGE COMMISSION

Issuer Delisting; Notice of Application of Internacional de Ceramica, S.A. de C.V. To Withdraw its American Depositary Shares (Each American Depositary Share Representing Five Limited Voting Units), Limited Voting Units (Which Consist of One Series D and One Series L Share), Series D Shares, No Par Value, and Series L Shares, No Par Value from Listing and Registration on the New York Stock Exchange, Inc. File No. 333-12776

October 4, 2004

On September 14, 2004, Internacional de Ceramica, S.A. de C.V., a Mexican corporation ("Issuer"), has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 12d2-2(d) thereunder,² to withdraw its American Depositary Shares (Each American Depositary Share Representing Five Limited Voting Units), Limited Voting Units (which consist of one Series D and one Series L Shares), Series D Shares, no par value, and Series L Shares, no par value ("Securities"), from listing and registration on the New York Stock Exchange, Inc. ("NYSE" or "Exchange").

The Board of Directors ("Board") of the Issuer approved a resolution on September 8, 2004 to withdraw the Issuer's Securities from listing on the NYSE. The Board stated that following reasons factored into its decision to withdraw the Issuer's Securities from the Exchange: (i) The dramatically increasing costs associated with the preparation and filing of the Issuer's

periodic reports with the Commission and other expenses related to listing the Securities on the NYSE; (ii) the limited number of registered holders resident in the United States; (iii) the lack of analyst coverage and minimal liquidity in trading of the Securities; (iv) the infrequent trading of the Securities on the NYSE and the likelihood that such trading volume would not increase materially in the foreseeable future; (v) the costs associated with the continued listing of Securities are disproportionately high, given the limited trading volume; (vi) the limited voting units underlying the Securities will continue to be listed and traded on the Bolsa Mexicana de Valores, S.A. de C.V. ("Bolsa"); (vii) the belief of the Issuer that concentration of its Securities on the Bolsa alone rather than on two different trading markets will improve liquidity in and trading of its Securities; and (viii) the benefits associated with maintaining listing and registration in the United States are outweighed by the costs of maintaining the listing and registration.

The Issuer stated in its application that it has complied with all the applicable laws in effect in Mexico, in which it is incorporated, and with the NYSE's rules governing an issuer's voluntary withdrawal of a security from listing and registration. The Issuer stated in its application that it has met the requirements of the NYSE rules governing an issuer's voluntary withdrawal of a security from listing and registration.

The Issuer's application relates solely to the Securities' withdrawal from listing on the NYSE and from registration under section 12(b) of the Act,³ and shall not affect its obligation to be registered under section 12(g) of the Act.⁴

Any interested person may, on or before October 27, 2004, comment on the facts bearing upon whether the application has been made in accordance with the rules of the NYSE, and what terms, if any, should be imposed by the Commission for the protection of investors. All comment letters may be submitted by either of the following methods:
