

personnel are operating and maintaining control equipment properly. The NSPS for HMIWIs requires initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any start-up, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance and are required of all sources subject to NSPS.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information are estimated to average 145 hours per response. Burdens means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Facilities burning hospital waste and/or medical infectious waste.

Estimated Number of Respondents: 7.
Frequency of Response: Initially, annually, semiannually, on occasion.

Estimated Total Annual Hour Burden: 4,795 hours.

Estimated Total Annual Costs: \$327,929, which includes \$2,000 annualized capital/startup costs, \$20,000 annual O&M costs, and \$305,929 annual labor costs.

Changes in the Estimates: There is an increase of two hundred and fifty-four hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This is primarily due to an increase in the number of sources.

ICR Title: Certification of Pesticide Applicators

ICR Status: This is a request for extension of an existing approved collection that is currently scheduled to expire on October 31, 2004. EPA is asking OMB to approve this ICR for

three years. Under 5 CFR 1320.12(b)(2), the Agency may continue to conduct or sponsor the collection of information while the submission is pending at OMB.

Abstract: FIFRA allows the EPA to classify a pesticide as "restricted use" if the pesticide meets certain toxicity or risk criteria. Restricted use pesticides, because of their potential to harm human health or the environment, may be applied only by a certified applicator or by a person under the direct supervision of a certified applicator. A person must meet certain standards of competency to become a certified applicator. States can be delegated the certified applicator program, but it must be approved by the Agency before it can be implemented. In non-participating entities, EPA administers the certification program.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information that is subject to approval under the PRA, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's information collections appear on the collection instruments or instructions, in the **Federal Register** notices for related rulemakings and ICR notices, and, if the collection is contained in a regulation, in a table of OMB approval numbers in 40 CFR part 9.

Burden Statement: The annual "respondent" burden for this ICR is estimated to be 4,412 hours. According to the Paperwork Reduction Act, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For this collection, it is the time reading the regulations, planning the necessary data collection activities, conducting tests, analyzing data, generating reports and completing other required paperwork, and storing, filing, and maintaining the data. The agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this information collection appear at the beginning and the end of this document. In addition OMB control numbers for EPA's regulations, after initial display in the final rule, are listed in 40 CFR part 9.

The following is a summary of the burden estimates taken from the ICR:

Respondents/affected entities: You may be affected by this action if you run an EPA approved certified pesticide applicator program for restricted use pesticides or are a certified pesticide

applicator using restricted use pesticides that must comply with requirements of Section 11 of the Federal Insecticide, Fungicide, and Rodenticide Act and 40 CFR part 171.

Estimated total number of potential respondents: 424,398.

Frequency of response: As needed or annually, depending on the category of respondent.

Estimated total/average number of responses for each respondent: 1-3.

Estimated total annual burden hours: 1,311,368.

Estimated total annual costs: \$25,108,623.

Changes in the ICR since the last approval:

The estimated paperwork burden has increased slightly from 1,285,865 to 1,311,368 hours due to an expected increase in the number of certified commercial applicators participating in the EPA-administered program. EPA will begin administering a private applicator program in the Navajo Indian Country within the next 3 years, thus increasing the number of applicators subject to the information collection activities. The cost burden has risen as well, primarily as a result of inflation from \$21,456,058 to \$25,108,623.
