

with the State of California, DHS, and under which DHS will participate in a computer matching program with CMS, to study claims, billing, and eligibility information to detect suspected instances of Medicare and Medicaid fraud and abuse (F&A) in the State of California. CMS and DHS will provide Electronic Data Systems (EDS), a CMS contractor (hereinafter referred to as the "Custodian"), with Medicare and Medicaid records pertaining to eligibility, claims, and billing which the Custodian will match in order to merge the information into a single database. Utilizing fraud detection software, the information will then be used to identify patterns of aberrant practices requiring further investigation. The following are examples of the type of aberrant practices that may constitute F&A by practitioners, providers, and suppliers in the State of California expected to be identified in this matching program: (1) Billing for provision of more than 24 hours of services in one day; (2) providing treatment and services in ways more statistically significant than similar practitioner groups; and (3) up-coding and billing for services more expensive than those actually performed.

CATEGORIES OF RECORDS AND INDIVIDUALS COVERED BY THE MATCH:

This CMP will enhance the ability of CMS and DHS to detect F&A by matching claims data, eligibility, and practitioner, provider, and supplier enrollment records of Medicare beneficiaries, practitioners, providers, and suppliers in the State of California against records of Medicaid/Medi-Cal beneficiaries, practitioners, providers, and suppliers in the State of California.
