SUPPLEMENTARY INFORMATION: On September 24, 2004, the U.S. Fish and Wildlife Service (Service) issued a permit (PRT-094219) to the Lincoln Park Zoological Park, Chicago, IL, to import tissue samples from a male chimpanzee (*Pan troglodytes*) which died in the wild in the Gombe Stream Reserve, Tanzania, for the purpose of scientific research to determine the cause of death and possible veterinary intervention required. This action was authorized under Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*). The Service determined that an emergency affecting the health and life of the remaining chimpanzee population of the Gombe Stream Reserve existed, and that no reasonable alternative was available to the applicant for the following reasons.

The Lincoln Park Zoo requested a permit to import multiple tissue samples from a male chimpanzee which recently died in the Gombe Stream Reserve, Tanzania for emergency and ongoing health/disease evaluation purposes. Samples will be utilized exclusively for diagnostic and scientific purposes. The specimens will be used to run diagnostics tests to determine the cause of death of the animal that died. Additional animals appear to be affected with similar symptoms as the animal which died and the necessary diagnostic testing is not available in Africa to adequately and quickly diagnose the pathogen or pathogens involved. The determination of the cause of the illness

and possible treatment as quickly as possible will benefit the chimpanzee population in the wild.
