SUPPLEMENTARY INFORMATION:

I. Abstract

The proposed rule for Framework Adjustment 40-A (Framework 40-A) to the NE Multispecies Fishery Management Plan (FMP) was published in the **Federal Register** on September 14, 2004 (69 FR 55388). Framework 40-A was developed by the New England Fishery Management Council (Council) to provide additional opportunities for vessels in the fishery to target relatively healthy stocks of groundfish in order to mitigate the economic and social impacts resulting from the effort reductions promulgated by Amendment 13 to the NE Multispecies FMP (69 FR 22906, April 27, 2004), and to harvest groundfish stocks at levels that approach optimum yield. Framework 40-A proposes to create three programs to allow vessels to use Category B Days-

at-Sea (DAS) (both Regular and Reserve) to target healthy stocks: (1) Regular B DAS Pilot Program; (2) Closed Area I Hook Gear Haddock Special Access Program (SAP); and (3) Eastern U.S./Canada Haddock SAP Pilot Program.

In addition, Framework 40-A proposes to relieve an Amendment 13 restriction that currently prohibits vessels from fishing both in the Western U.S./Canada Area, and outside that area on the same trip.

The information collection for the provisions relating to logbook requirements within Framework 40-A was approved by the Office of Management and Budget in an emergency clearance submission on September 22, 2004. This information collection submission included daily catch reports for vessels participating in the Category B (regular) DAS Pilot Program or fishing on combined trips in the Western U.S./Canada Area and outside of the area. This submission also included daily catch reports for vessels that are not participating in the Georges Bank (GB) Cod Hook Sector and that would be fishing in the Closed Area I Hook Gear Haddock SAP. Daily catch reports for vessels participating in the Eastern U.S./Canada Area Haddock SAP Pilot Program were previously considered and approved under the information collection submitted for Amendment 13.

II. Method of Collection

Catch reports for vessels participating in the above programs proposed in Framework 40-A would be required to be submitted on a daily basis. In addition, for those vessels participating in the Closed Area I Hook Gear Haddock SAP or fishing on a combined trip into the Western U.S./Canada Area, vessels would also be required to submit a catch report when entering or exiting each area. The catch reports would be required to be submitted using the vessel monitoring system (VMS) aboard each vessel. Reporting this information via VMS is required to monitor the catches of regulated multispecies so that the incidental catch hard total allowable catches (TACs) associated with the U.S./Canada Resource Sharing Agreement for GB cod, GB haddock, or GB yellowtail flounder, and the incidental catch TACs for species of concern proposed in Framework 40-A, would not be exceeded. These data would also be used in biological analyses and stock assessments, regulatory impact analyses, quota allocation selections and monitoring, economic profitability profiles, and analysis of ecological interactions among species.

III. Data

Type of Review: Regular submission.

Affected Public: Business or other for profit organizations; and individuals or households.

Estimated Total Annual Burden Hours: 2,533.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and

SUPPLEMENTARY INFORMATION:**Background**

On June 3, 2004, NMFS published a proposed policy addressing the role of hatchery produced Pacific salmon and *O. mykiss* in ESA listing determinations (69 FR 31354; "proposed hatchery listing policy"). The proposed hatchery listing policy would supersede NMFS' 1993 Interim Policy on salmonid artificial (hatchery) propagation (58 FR 17573; April 5, 1993), which requires revision following the 2001 U.S. District Court ruling in *Alsea Valley Alliance v. Evans* (161 F. Supp. 2d 1154, D. Ore. 2001; appeal dismissed, 358 F.3d 1181 (9th Cir. 2004); *Alsea* ruling). The *Alsea* ruling held that NMFS had made an improper distinction under the ESA by not listing certain artificially propagated salmon populations determined to be part of the same Evolutionarily Significant Unit (ESU) as listed natural populations. Under the proposed hatchery listing policy: hatchery fish with a level of genetic divergence relative to local natural populations that is no more than would be expected between closely related populations within the ESU would be included as part of the ESU; within-ESU hatchery fish would be considered in determining whether the ESU should be listed under the ESA; and within-ESU hatchery fish would be included in any listing of the ESU. NMFS applied this proposed policy in conducting its comprehensive review of ESA listing status for 26 previously listed ESUs, and one candidate ESU, of West Coast salmon and *O. mykiss*.

With the publication of the proposed hatchery listing policy NMFS announced a 90-day public comment period extending through September 1, 2004. In **Federal Register** notices published on August 31, 2004 (69 FR 53039) and September 9, 2004 (69 FR 54647), NMFS extended the public comment period for the proposed policy through October 20, 2004. Additionally, NMFS announced that it would hold
