The proposed research involves a continuation of studies designed to evaluate hearing and visual sensitivity, memory, and learning capabilities of up to seven captive pinnipeds (three California sea lions, *Zalophus californianus*; two Pacific harbor seals, *Phoca vitulina*; and two Northern elephant seals, *Mirounga angustirostris*). Animals would be trained using positive reinforcement and would voluntarily participate in up to three

experimental sessions per day, up to seven days per week annually at Long Marine Laboratory. This research would improve knowledge of pinniped sensory adaptations, examine mechanisms for acquiring and processing sensory information, and develop procedures for rapidly and humanely studying marine mammal hearing and the effects of anthropogenic noise. These efforts would support research priorities for marine mammals that have been identified by the National Research Council. The permit has been requested for a 5-year period. In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
