(Form MMS-4295, Gas Transportation Allowance Report), and § 206.180—How do I determine an actual processing allowance? (Form MMS-4109, Gas Processing Allowance Summary Report).

OMB Control Number: 1010-0075.

Bureau Form Number: Forms MMS-4295 and MMS-4109.

Abstract: The Secretary of the U.S. Department of the Interior is responsible for matters relevant to mineral resource development on Federal and Indian lands and the Outer Continental Shelf (OCS). The Secretary, under the Mineral Leasing Act (30 U.S.C. 1923) and the Outer Continental Shelf Lands Act (43 U.S.C. 1353), is responsible for managing the production of minerals from Federal and Indian lands and the OCS, collecting royalties from lessees who produce minerals, and distributing the funds collected in accordance with applicable laws.

The Secretary has an Indian trust responsibility to manage Indian lands and seek advice and information from Indian beneficiaries. The MMS performs the royalty management functions and assists the Secretary in carrying out the Department's Indian trust responsibility. Applicable citations of the laws pertaining to mineral leases on Indian lands include 25 U.S.C. 396d (Chapter 12—Lease, Sale, or Surrender of Allotted or Unallotted Lands); 25 U.S.C. 2103 (Indian Mineral Development Act of 1982); and Public Law 97-451—Jan. 12, 1983 (Federal Oil and Gas Royalty Management Act of 1982).

When a company or an individual enters into a lease to explore, develop, produce, and dispose of minerals from Federal or Indian lands, that company or individual agrees to pay the lessor a share (royalty) of the value received from production from the leased lands. The lease creates a business relationship between the lessor and the lessee. The lessee is required to report various kinds of information to the lessor relative to the disposition of the leased minerals. Such information is similar to data reported to private and public mineral interest owners and is generally available within the records of the lessee or others involved in developing, transporting, processing, purchasing, or selling of such minerals. The information collected includes data necessary to ensure that the royalties are paid appropriately.

Proprietary information submitted to MMS under this collection is protected, and no items of a sensitive nature are collected. The MMS requires a response to obtain the benefit of transportation or processing allowance on an Indian lease.

Transportation Allowances—Under certain circumstances, lessees are authorized to deduct from royalty payments the reasonable actual costs of transporting the royalty portion of produced minerals from the lease to a processing or sales point not in the

immediate lease area. Transportation allowances are part of the product valuation process MMS uses to determine if the lessee is reporting and paying the proper royalty amount.

Processing Allowances—When gas is processed for the recovery of gas plant products, lessees may claim a processing allowance. The MMS normally accepts the cost as stated in the lessee’s arm’s-length processing contract as being representative of the cost of the processing allowance. In those instances where gas is being processed through a lessee-owned plant, the lessee must base processing costs on the actual plant operating and maintenance expenses, depreciation, and a reasonable return on investment. The allowance is expressed as a cost per unit of individual gas plant products. Lessees may take processing allowances as a deduction from royalty payments.

The MMS collects transportation allowance data on Form MMS–4295, Gas Transportation Allowance Report.

The MMS collects processing allowance data on Form MMS–4109, Gas Processing Allowance Summary Report. The MMS and tribal personnel use the information collected on Forms MMS–4295 and MMS–4109 to evaluate the reasonableness of allowances reported and claimed by lessees. To take a transportation deduction, a lessee must submit Form MMS–4295 before or in the same month the lessee reports the transportation allowance on Form MMS–2014, Report of Sales and Royalty Remittance (OMB Control Number 1010–0140, expiration date October 31, 2006). To take a processing deduction, a lessee must submit Form MMS–4109 before or in the same month the lessee reports the processing allowance on Form MMS–2014.

The MMS is requesting OMB’s approval to continue to collect this information. Not collecting this information may result in the undervaluation of leased minerals.

Frequency: Annually and on occasion.

Estimated Number and Description of Respondents: 50 Indian lessees.

Estimated Annual Reporting and Recordkeeping “Hour” Burden: 285 hours.

We base our calculations of the estimated burden hours on the reasonable expectation of 92 responses from 50 Indian lessees. We are including reporting requirements for arm’s-length contracts, which were overlooked in the previous renewal. Each company may file numerous responses for transportation and/or processing allowances due to arm’s-length and/or non-arm’s-length contracts. Through customer contact, we have obtained more accurate estimates of the time required to provide the information requested. We have not included in our estimates certain requirements performed in the normal course of business and considered usual and customary. The following chart shows the estimated burden hours by CFR section and paragraph:
