Title: Child Care and Development Fund Annual Financial Report for Tribes (ACF-696T).

OMB No.: 0970-0195.

Description: The Child Care and Development Fund (CCDF) annual financial reporting form (ACF-696T) provides a mechanism for Indian Tribes to report expenditures under the CCDF program. The CCDF program provides funds to Tribes, as well as States and Territories, to assist low-income families in obtaining child care so that they can work or attend training/education, and to improve the quality of care. Information collected via the ACF-696T allows the Administration for Children and Families (ACF) to monitor tribal expenditures and to estimate outlays and may be used to prepare ACF budget submissions to Congress. This information collection uses the existing ACF-696T form, without any changes. Office of Management and Budget (OMB) approval for the existing form expires on March 31, 2005.

Respondents: Indian Tribes and Tribal Organizations that are CCDF grantees.

Title: Fourth National Incidence Study of Child Abuse and Neglect.
 OMB No.: 0970-0276.

Description: The Department of Health and Human Services (HHS) intends to issue letters to recruit agencies for participation in the next National Incidence Study of Child Abuse and Neglect (NIS). This will be the fourth cycle of this periodic study. NIS-1, mandated under Public Law (Pub. L.) 93-247 (1974), was conducted in 1979 and 1980 and reported in 1981. The NIS-2, mandated under (Pub. L.) 98-457 (1984), was conducted in 1986 and 1987, and reported in 1988. NIS-3, mandated under both the Child Abuse Prevention, Adoption, and Family Services Act of 1988 (Pub. L.) 100-294)

and the Child Abuse, Domestic Violence, Adoption and Family Services Act of 1992 (Pub. L.) 102–295, conducted between 1993 and 1995, and reported in 1996. NIS–4, mandated by the Keeping Children and Families Safe Act of 2003 (Pub. L.) 108–36), will be reported in 2006.

NIS is unique in that it goes beyond the abused and neglected children who come to the attention of the Child Protective Services (CPS) system. In contrast to the National Child Abuse and Neglect Data Systems (NCANDS), which rely solely on reported cases. The NIS design assumes that reported children represent only a portion of the children who actually are maltreated. Following the implications of its assumptions, NIS estimates the scope of the maltreated child population by combining information about reported cases with data on maltreated children identified by professionals (called “sentinels”) who encounter them during the normal course of their work in a wide range of agencies in representative

communities. Sentinels are asked to remain on the lookout for children whom they believe are maltreated during the study reference period and to provide information about these children. Children identified by sentinels and those children whose alleged maltreatment is investigated by CPS during the same period are evaluated against standardized definitions, and only children who meet the study standards are used to develop the study estimates. The study estimates are couched in terms of numbers of maltreated children, with data unduplicated so that a given child is counted only once. Confidentiality of all participants is carefully protected.

A nationally representative sample of 120 counties will be selected and all local CPS agencies serving the selected counties will be identified. Plans will be developed to obtain data on cases investigated during the study reference period, September 4, 2005 to December 3, 2005. Sentinels in the selected counties will be identified through

samples of agencies in 11 categories: county juvenile probation departments, sheriff (and/or state police) departments, public health departments, public housing departments, municipal police departments, hospitals, schools, day care centers, social service agencies, mental health agencies, and shelters for battered women or runaway/homeless youth. A total of approximately 1,600 sentinel agencies will be sampled. Plans will be developed to identify staff in these agencies who have direct contact with children to serve as sentinels during the study by submitting data on maltreated children they encounter during the study reference period. In preparation for the study, letters will be sent to the directors of the selected agencies asking them to permit their agencies to participate in NIS–4, and describing the general nature of the data collection effort. HHS will issue a subsequent notice of proposed data collection for this study after data collection plans are developed.

Title: Social Services Block Grant Postexpenditure Report.

OMB No. 0970–0234.

Description:

Purpose: To improve the quality of Social Services Block Grant (SSBG) expenditure data, the postexpenditure reporting form and instructions need minor formatting revisions to reduce confusion and reporting inconsistencies that have resulted from the current form. As a block grant, SSBG provides the States with a flexible source of funds for social service needs. Accurate accounting of how these funds are used and whom they serve is critical to ensure that necessary and sufficient funding continues to be allocated. For
