

imported waters, to MCB Camp Pendleton and Fallbrook. Reclamation prepared a supplemental EIS for the project in 1984. However, Congress did not approve the project's funding. A subsequent effort to design a smaller, single dam project was also unsuccessful.

A 1994 study, with additional reports in 2001 and 2002, concluded that a groundwater recharge and extraction project (*i.e.*, conjunctive use) may result in an annual yield comparable to that of the two-dam project, at a lower cost and with fewer adverse environmental effects.

The conference report for the 2003 Omnibus Appropriations Act (Pub. L. 108-7) directed Reclamation, under the Santa Margarita feasibility authorization, to perform the studies needed to address current and future municipal, domestic, military, environmental, and other water uses from the Santa Margarita River. The 2004 Energy and Water Appropriations Act (Pub. L. 108-137) provided funding for Reclamation to study the feasibility of the Santa Margarita Conjunctive Use Project.

Through previous investigations, several areas of potential impact have been identified that apply to this proposed conjunctive use project. Potential impacts identified to date include, but are not limited to, the following areas: Water quality/quantity (surface and groundwater), water rights, water reuse, fish passage, endangered species, estuarine habitat, riparian/wetland habitat, and sediment transport.

MCB Camp Pendleton, Reclamation, and Fallbrook have scheduled public meetings to describe the proposed project and obtain public input on the range of issues that should be studied in order to evaluate potential impacts of the proposed project. Each meeting will begin with a formal presentation about the proposed project from 6 p.m. to 6:30 p.m. followed by an informal open house from 6:30 p.m. to 8 p.m.

These meetings will assist the agencies in identifying additional alternatives or options to meet the stated purpose of the conjunctive use project and to assist in determining issues that will be analyzed in the EIS/EIR.

In response to issues developed during scoping, other alternative means of meeting the project's purpose will be explored and analyzed in the EIS/EIR, if found to be reasonable. Federal, state and local agencies, tribes, and the general public are invited to participate in the environmental review process.

Comments, including names and home addresses of respondents, will be made available for public review.

Individual respondents may request their home address be withheld from public disclosure. Circumstances may exist in which we would withhold a respondent's identity from public disclosure, as allowable by law. Please prominently state at the beginning of your comment if you wish your name and/or address withheld from public disclosure. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public disclosure in their entirety. Please note, unidentified comments will not be considered.
