principal place of business of the standards development organization and (2) the nature and scope of its standards development activities. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the name and principal place of business of the standards development organization is: American Petroleum Institute, Washington, DC. The nature and scope of API's standards development activities are: Development and maintenance of voluntary standards for the petroleum industry through committees charged with developing standards for (1) oilfield equipment and materials, (2) petroleum measurement, (3) refinery equipment, (4) marketing operations, (5) pipeline transportation, (6) fire and safety, (7) lubricants, and (8) business and information technology. More information regarding API standards development activities may be obtained from the API Web site at *http://www.api.org,* which includes contact information for API standards activities.

Dorothy B. Fountain,

Deputy Director of Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—ENrG/Corning Fuel Cell Research

Notice is hereby given that, on October 8, 2004, pursuant to section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), ENrG/Corning Fuel Cell Research (''ENrG'') has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identifies of the parties to the venture and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to section 6(b) of the Act, the identities of the parties to the venture are: Corning Incorporated, Corning, NY; and ENrG Incorporated, Buffalo, NY. The general areas of ENrG's planned activities are to develop and demonstrate scalable thin, large area planar solid oxide fuel cell (SOFC) and stack technology for enterprise-level primary and cogeneration distributed power that can cycle repeatedly and be more easily fabricated into 200kW power units.

Additional information concerning the venture can be obtained by contacting Joan Kane at Corning Incorporated, One Science Center Drive, Corning, NY 18431.
