

agencies; public interest groups; individuals and affected landowners who requested a copy of the final EIS; libraries; newspapers; and parties to this proceeding.

In accordance with the Council on Environmental Quality's (CEQ) regulations implementing the NEPA, no agency decision on a proposed action may be made until 30 days after the U.S. Environmental Protection Agency publishes a notice of availability of a final EIS. However, the CEQ regulations provide an exception to this rule when an agency decision is subject to a formal internal appeal process which allows other agencies or the public to make their views known. In such cases, the agency decision may be made at the same time the notice of the final EIS is published, allowing both periods to run concurrently. The Commission's decision for this proposed action is subject to a 30-day rehearing period.

Notice of Amendment Application and Soliciting Comments, Motions To Intervene, and Protests

November 5, 2004.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Temporary license amendment to decrease the minimum flow requirement.

b. *FERC Project No.:* 10855-038.

c. *Date Filed:* October 27, 2004.

d. *Applicant:* Upper Peninsula Power Company.

e. *Name of Project:* Dead River.

f. *Location:* The Dead River Project is located on the Dead River in Marquette County, Michigan.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a), 825(r) and 799 and 801.

h. *Applicant Contact:* Mr. Terry P. Jensky, Assistant Vice President Energy Supply-Operations, Wisconsin Public Service Corporation, 600 North Adams Street, P.O. Box 19002, Green Bay, Wisconsin 54307-9002.

i. *FERC Contact:* Any questions regarding this notice should be addressed to Mr. T.J. LoVullo at (202) 502-8900.

j. *Description of Request:* Due to the abnormally dry late summer and fall and the reduced inflow into the Hoist reservoir, Upper Peninsula Power Company (UPPCO) requests to temporarily reduce the minimum flow discharged downstream of the Hoist powerhouse from the required 100 cubic feet per second (cfs) to 60 cfs. Analysis indicates that at the current rate of discharge from the Hoist reservoir, it appears that the reservoir will be lowered to 1318 feet (mean sea level) by about mid-December. At a water elevation of 1318 feet, no additional water can be released from the Hoist reservoir and there is a danger of the penstocks freezing. There is also a danger of the minimum flows being completely shut down.

Therefore, in an effort to conserve water for the winter months and future minimum flows, UPPCO requests the following operation scenario: reduce the minimum flows at the Hoist powerhouses from 100 cfs to 60 cfs, or to the minimum flow rate required for safe operation of the turbine; if the reservoir level drops below 1325 feet, hold a meeting or teleconference with the resource agencies to discuss strategy; if the reservoir level drops below 1320 feet, shut down the turbine and release a minimum flow of approximately 6 cfs to keep the penstock from freezing; if the reservoir level begins to rise while maintaining the 60 cfs minimum flow, and rises to the elevation of 1330 feet, an additional 5 cfs will be released from the Hoist powerhouse via the bypass siphon at McClure; if the reservoir goes above 1332 feet the minimum discharge of 100 cfs will be maintained until the reservoir level goes below 1330 feet or spring runoff occurs.

k. *Deadline for Filing Comments or Motions:* December 6, 2004.

l. *Locations of the Application:* A copy of the application is available for

inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426 or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
