Respondents/Affected Entities:

Manufacturers of ethylene dichloride, vinyl chloride monomer, and polyvinyl chloride.

Estimated Number of Respondents:

28.

Frequency of Response: Initially, quarterly, and on occasion.

Estimated Total Annual Hour Burden: 11,825 hours.

Estimated Total Capital and Operations & Maintenance (O&M) Annual Costs: \$2,014,515, which includes \$0 annualized capital/startup, \$1,260,000 annual O&M costs, and \$754,515 Respondent Labor Costs.

Changes in the Estimates: There is a decrease of 4,334 hours in the total estimated hours burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease in the burden from the most recently approved ICR is due to a decrease in the number of existing sources. Our data indicates that there are approximately forty-four sources in the active ICR compared to twenty-eight sources in the renewal, reflected in the change in the hourly burden.

Title: PCBs; Consolidated Reporting and Recordkeeping Requirements.

Abstract: Section 6(e)(1) of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2605(e), directs EPA to regulate the marking and disposal of PCBs. Section 6(e)(2) bans the manufacturing, processing, distribution in commerce, and use of PCBs in other than a totally enclosed manner. Section 6(e)(3) establishes a process for obtaining exemptions from the prohibitions on the manufacture, processing, and distribution in commerce of PCBs. Since 1978, EPA has promulgated numerous rules addressing all aspects of the life cycle of PCBs as required by the statute. The regulations are intended to prevent the improper handling and disposal of PCBs and to minimize the exposure of human beings or the environment to PCBs. These regulations have been codified in the various subparts of 40 CFR part 761. There are approximately 100 specific reporting, third-party reporting, and recordkeeping

requirements covered by 40 CFR part 761.

To meet its statutory obligations to regulate PCBs, EPA must obtain sufficient information to conclude that specified activities do not result in an unreasonable risk of injury to health or the environment. EPA uses the information collected under the 40 CFR part 761 requirements to ensure that PCBs are managed in an environmentally safe manner and that activities are being conducted in compliance with the PCB regulations. The information collected by these requirements will update the Agency's knowledge of ongoing PCB activities, ensure that individuals using or disposing of PCBs are held accountable for their activities, and demonstrate compliance with the PCB regulations. Specific uses of the information collected include determining the efficacy of a disposal technology; evaluating exemption requests and exclusion notices; targeting compliance inspections; and ensuring adequate storage capacity for PCB waste.

Responses to the collection of information are mandatory (see 40 CFR part 761). Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9 and included on the related collection instrument or form, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average about 1 hour per response. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of

information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Persons who currently possess PCB Items, PCB-contaminated equipment, or other PCB waste.

Frequency of Collection: On occasion.
Estimated No. of Respondents: 814,120.

Estimated Total Annual Burden on Respondents: 824,778 hours.

Estimated Total Annual Costs: \$23,005,750.

Changes in Burden Estimates: This request reflects an increase of 83,517 hours (from 741,261 hours to 824,778 hours) in the total estimated respondent burden from that currently in the OMB inventory. This increase is due to revisions to the total number of respondents. In some cases, the total number of respondents was based on number of facilities, in other cases, the total number of respondents was calculated by estimating the total number of pieces of equipment that respondents must monitor for a particular requirement. These burden changes were the result of new data gathered for this ICR renewal as well as a recent PCB regulatory analysis, estimate adjustments made for consistency with a recent Agency report, and updated Agency data regarding total numbers of regulated entities. The change in burden represents an adjustment.
