SUPPLEMENTARY INFORMATION: On October 4, 2004, we published a notice in the **Federal Register** (69 FR 59181-59182, Docket No. 04-076-1) in which we advised the public that the Animal and Plant Health Inspection Service (APHIS) has received a petition from Monsanto Company of St. Louis, MO (Monsanto) seeking a determination of nonregulated status for cotton designated as MON 88913, which has been genetically engineered for tolerance to the herbicide glyphosate. The petition has been submitted in accordance with our regulations concerning the introduction of certain genetically engineered organisms and products. In accordance with those regulations, our notice solicits public comments on whether this cotton presents a plant pest risk. In the notice, we also made available for public comment an environmental assessment (EA) for the proposed determination of nonregulated status. As stated in that notice, we will consider all comments we receive on or before December 3, 2004.

On November 8, 2004, APHIS received a letter from Monsanto amending the petition made available for public comment in our October 4, 2004, notice. The information in the addendum clarifies information in the petition with respect to the molecular

genetic characterization of the inserted DNA and corrects portions of that section. APHIS promptly reviewed these changes and determined that they had no impact on the EA we prepared to examine any environmental impacts of the proposed determination for the subject cotton. The addendum has been added to the petition file and is available to facilitate the review of the petition.

We continue to solicit written comments from interested persons on the petition and the EA. In addition to the amended petition, the EA and any comments received are available for public review. Copies of the amended petition and the EA are available as indicated in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

After the comment period closes, APHIS will review the data submitted by the petitioner, all written comments received during the comment period, and any other relevant information. After reviewing and evaluating the comments on the petition and the EA and other data and information, APHIS will furnish a response to the petitioner, either approving the petition in whole or in part, or denying the petition. APHIS will then publish a notice in the **Federal Register** announcing the regulatory status of Monsanto's glyphosate-tolerant MON 88913 cotton and the availability of APHIS' written decision.

Trade Adjustment Assistance for Farmers

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Notice.

The Administrator, Foreign Agricultural Service (FAS), today terminated the certification of a petition for trade adjustment assistance (TAA) that was filed by the Catfish Farmers of America and certified on November 25, 2003. Catfish producers in Alabama, Arkansas, Florida, Georgia, Idaho, Illinois, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Nevada, North Carolina, Ohio, Oklahoma, South Carolina, Texas, and Utah will not be eligible for TAA benefits in fiscal year 2005.

SUPPLEMENTARY INFORMATION: Upon investigation, the Administrator determined that domestic producer prices did not decline at least 20 percent during the 2003 marketing year (January–December), when compared to average prices during the 5-year base period ending December 2001. In addition, during the 2003 marketing year, imports did not increase, but declined by 16.2 percent. Both conditions, a decline in prices of at least 20 percent and an increase in imports, are required for re-certifying a petition for TAA.

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Notice.

The Administrator, Foreign Agricultural Service (FAS), re-certified the trade adjustment assistance (TAA) petition that was filed by the Georgia Shrimp Association on behalf of Georgia shrimpers and initially certified on November 19, 2003. Shrimpers who land their catch in Georgia will be eligible to apply for fiscal year 2005 benefits during a 90-day period beginning on November 29, 2004. The application period closes on February 28, 2005.

SUPPLEMENTARY INFORMATION: Upon investigation, the Administrator

determined that continued increases in imports of like or directly competitive products contributed importantly to a decline in the average landed price of shrimp in Georgia by 37.7 percent during the 2003 marketing period (January–December), compared to the 1997–2001 base period. Eligible producers may request technical assistance from the Extension Service at no cost and receive an adjustment assistance payment, if certain program criteria are satisfied. ACTION: Notice of intent to prepare an environmental impact statement.

DATES: Comments concerning the scope of the analysis must be received by December 22, 2004. The draft environmental impact statement is expected to be available for public review by March 2005 and the final environmental impact statement is expected to be completed by June 2005.
