

32 CFR 989) to determine the potential environmental consequences of the Airspace Training Initiative. The Federal Aviation Administration is participating as a cooperating agency in this process.

As part of the Airspace Training Initiative proposal, the Air Force will analyze alternatives to modify Shaw AFB's airspace to enhance the ability of the 20th Fighter Wing at Shaw AFB and the 169th Fighter Squadron at McEntire ANG to train as they need to fight in the evolving Global War on Terror. The proposed action includes the following:

- Creating a new Military Operations Area (MOA), that joins the western boundary of the existing Gamecock D MOA with the eastern boundary of existing Poinsett Electronic Combat Range (ECR).
- Lowering the floor of the existing Gamecock D MOA from 10,000 to 5,000 feet mean sea level (MSL) and combining and using Gamecock C and Gamecock D MOAs concurrently and simultaneously.
- Raising the ceiling on the existing Poinsett Low MOA from 2,500 feet MSL to 5,000 feet MSL.
- Modifying the boundary of the existing Bulldog A MOA to match that of Bulldog B MOA and lowering the current 11,000 foot MSL floor of the "shelf area" to 500 feet above ground level (AGL) to coincide with the Bulldog A floor.
- Extending the use of defensive training with training chaff and flares into the new and modified airspace. Developing training transmitter sites beneath the Bulldog and Gamecock MOAs and along the coast of South Carolina.

Alternatives to the proposed action include variations in altitude structure, special use airspace boundaries, extent and number of transmitter sites, and a no-action alternative.

The Air Force will accept comments at any time during the environmental analysis process. However, to ensure the Air Force has sufficient time to consider public input in the preparation of the Draft EIS, the scoping period has been extended. Comments should be submitted to the address below by December XX, 2004.
