*Description:* Since the mid-1980s, there has been a growing belief among labor market researchers that employers require greater flexibility in their use of labor. As a result, many workers find themselves in "contingent jobs" that are structured to last for only limited duration or in alternative employment arrangements such as independent contracting, on-call work, working through a contract company, or through a temporary help firm. It is feared that workers with such employment may have little job security, low pay, and no employee benefits. This CPS supplement provides objective information about "contingent work."
