Background

This Draft PEIS focuses on broad approaches to address travel demand and performance of transportation systems within the context of the I-70 corridor communities and environmental setting. At this Tier 1 level of analysis, the Draft PEIS provides an evaluation of a broad range of mode choices and general locations of proposed transportation improvements for I-70 between Glenwood Springs and C-470. The study area extends

approximately 144 miles across Garfield, Eagle, Summit, Clear Creek and Jefferson Counties. This Draft PEIS includes an examination of the purpose and need, alternatives under consideration, travel demand, and consistent with a programmatic level of analysis, describes the affected environment, environmental consequences, and identifies mitigation policies for the proposed transportation systems under consideration. Twenty build alternatives and a No-Action Alternative are presented in the Draft PEIS. Of these, a group of nine preferred alternatives have been identified and are under consideration by FHWA and CDOT in the Draft PEIS. After a preferred alternative has been identified in the Final Programmatic EIS, and an alternative is selected in the Record of Decision, subsequent design, environmental analysis, documentation, and review will be prepared in a Tier 2 document, which will include site-specific, project level details.

Comments from interested parties on the Draft PEIS are encouraged and may be presented verbally at a public hearing or may be submitted in writing to the CDOT and/or the FHWA.

The FHWA and CDOT invite interested individuals, organizations, and federal, state, and local agencies to comment on the evaluated alternatives and associated social, economic, or environmental impacts related to the alternatives.

Issued on: December 3, 2004.

Assistant Division Administrator, Federal Highway Administration, Lakewood, Colorado.
