

the Notice of Availability in the **Federal Register**. It is important that those interested in the management of the Wallowa-Whitman National Forest participate at that time.

Comments received in response to this notice, including names and addresses of those who comment, will be considered part of the public record on this proposed action and will be available for public inspection. Comments submitted anonymously will be accepted and considered; however, those who submit anonymous comments will not have standing to appeal the subsequent decision under 36 CFR Parts 215. Additionally, pursuant to 7 CFR 1.27(d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that, under the FOIA, confidentiality may be granted in only very limited circumstances, such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within a specified number of days.

The Forest Service believes it is important to give reviewers notice, at this early stage, of several court rulings related to public participation in the environmental review process. First, reviewers of draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts the agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until completion of the final EIS may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider and respond to them in the final EIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental

impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft EIS or merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points).

The final EIS is scheduled for completion July 2005. In the final EIS, the Forest Service is required to respond to comments and responses received during the comment period that pertain to the environmental consequences discussed in the draft EIS and applicable laws, regulations, and policies considered in making a decision regarding the proposal.

The Forest Service is the lead agency. The Whitman Unit Ranger is the Responsible Official. The Responsible Official will decide which, if any, of the proposed plans will be implemented. The Responsible Official will also document the decision and reasons for the decision in the Record of Decision. That decision will be subject to Forest Service Appeal Regulations (36 CFR Part 215).

Dated: December 9, 2004.

Richard Haines,

Whitman Unit Ranger.

Avenue, NW., Washington, DC 20230; telephone: (202) 482-3797, or 482-1766, respectively.

Preliminary Determination

We preliminarily determine that chlorinated isocyanurates from the People's Republic of China ("PRC") are being, or is likely to be, sold in the United States at less than fair value ("LTFV"), as provided in section 733 of the Tariff Act of 1930, as amended ("the Act"). The estimated margins of sales at LTFV are shown in the "Suspension of Liquidation" section of this notice.

Interested parties are invited to comment on this preliminary determination. We will make our final determination not later than 135 days after the date of publication of this preliminary determination.

Case History

On May 14, 2004, the Department of Commerce ("the Department") received petitions for the imposition of antidumping duties on imports of chlorinated isocyanurates from the PRC and Spain, filed, in proper form, by Clearon Corporation and Occidental Chemical Corporation (hereafter known as the "Petitioners"). On May 24 and 28, 2004, the Petitioners filed amendments to their petition.

On June 4, 2004, the Department initiated antidumping duty investigations on chlorinated isocyanurates from the PRC and Spain. *See Notice of Initiation of Antidumping Duty Investigations: Chlorinated Isocyanurates from the People's Republic of China and Spain*, 69 FR 32488 (June 10, 2004) ("*Initiation Notice*"). The Department set aside a period for all interested parties to raise issues regarding product coverage. *See Initiation Notice*, 69 FR at 32489. We received comments regarding product coverage from interested parties. For a detailed discussion of the comments regarding the scope of the merchandise under investigation, please see the "Scope Comments" section below.

On June 4, 2004, the Department notified the International Trade Commission ("ITC") of the antidumping investigation initiation and the intent to publish in the **Federal Register** a notice of such initiation. On June 17, 2004, the Department issued initiation instructions to U.S. Customs and Border Protection ("CBP").

On June 28, 2004, the ITC issued its affirmative preliminary determination that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of imports from the PRC of chlorinated isocyanurates. *See*
