

Field Test Locations: Montana, Oklahoma, Iowa, Missouri, Tennessee, and Florida.

The above-mentioned product is a live canarypox vector that has been genetically modified to express genes from two equine influenza virus strains. The vaccine is for use in horses as an aid in the prevention of disease caused by equine influenza virus.

The EA has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provision of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Unless substantial issues with adverse environmental impacts are raised in response to this notice, APHIS intends to issue a finding of no significant impact (FONSI) based on the EA and authorize shipment of the above product for the initiation of field tests following the close of the comment period for this notice.

Because the issues raised by field testing and by issuance of a license are identical, APHIS has concluded that the EA that is generated for field testing would also be applicable to the proposed licensing action. Provided that the field test data support the conclusions of the original EA and the issuance of a FONSI, APHIS does not intend to issue a separate EA and FONSI to support the issuance of the product license, and would determine that an environmental impact statement need not be prepared. APHIS intends to issue a veterinary biological product license for this vaccine following completion of the field test provided no adverse impacts on the human environment are identified and provided the product meets all other requirements for licensing.

Authority: 21 U.S.C. 151–159.

Done in Washington, DC, this 14th day of December 2004.

Elizabeth E. Gaston,

Acting Administrator, Animal and Plant Health Inspection Service.

CENTRAL INTELLIGENCE AGENCY

Notice of Decennial Review of Operational Files Designations

AGENCY: Central Intelligence Agency.

ACTION: Notice of Decennial Review of Operational Files Designations.

SUMMARY: The Central Intelligence Agency (CIA or Agency) is soliciting comments regarding the historical value of, or other public interest in, the CIA files designated by the Director of Central Intelligence (DCI) pursuant to the CIA Information Act of 1984.

DATES: Comments must be received by January 20, 2005.

ADDRESSES: Submit comments in writing to Edmund Cohen, Director of Information Management Services, Central Intelligence Agency, Washington, DC 20505, or by fax to (703) 613–3020.

FOR FURTHER INFORMATION CONTACT: Edmund Cohen, Director of Information Management Services, Central Intelligence Agency, telephone 703–613–1215.

SUPPLEMENTARY INFORMATION: The CIA Information Act of 1984, codified in section 431 of title 50 of the United States Code, authorizes the DCI to exempt operational files of the CIA from the publication, disclosure, search, and review provisions of the Freedom of Information Act. The statute defines operational files as:

1. Files of the Directorate of Operations that document the conduct of foreign intelligence or counterintelligence operations or intelligence or security liaison arrangements or information exchanges with foreign governments or their intelligence or security services;

2. Files of the Directorate of Science and Technology that document the means by which foreign intelligence or counterintelligence is collected through scientific and technical systems; and

3. Files of the Office of Security that document investigations conducted to determine the suitability of potential foreign intelligence or counterintelligence sources; except that files that are the sole repository of disseminated intelligence are not operational files.

The CIA Information Act of 1984 requires that, not less than once every ten years, the DCI shall review the exemptions in force to determine whether such exemptions may be removed from any category of exempted files or any portion thereof. The Agency completed its first decennial review exercise in March 1995. The following represents a summary of the general categories of operational files that have been maintained within the Directorate of Operations, the Directorate of Science and Technology, and the Office of Security since the first decennial review:

1. Files of the Directorate of Operations that document the intelligence sources and methods associated with various operational and foreign liaison activities, that document the conduct and management of various operational and foreign liaison activities, and that document the assessment of the viability of potential operational and foreign liaison activities and potential intelligence sources and methods;

2. Files of the Directorate of Science and Technology that document the use of scientific and technical systems in the conduct of and in support of various operational and intelligence collection activities;

3. Files of the Office of Security that document various aspects of the investigations conducted to determine the suitability of potential foreign intelligence or counterintelligence
