

control technology (MACT) were proposed on August 4, 1998, promulgated on May 20, 1999, and amended most recently on March 22, 2001. The rule applies to ferroalloy production facilities that manufacture ferromanganese and silicomanganese that are major sources of hazardous air pollutants (HAPs) or are co-located at major sources of HAPs.

In general, all NESHAP (MACT) standards require initial notifications, performance tests, and periodic reports. Respondents that are not required to conduct an initial performance test are required to notify the Administrator of the initial compliance status of the source. Sources are also required to monitor and maintain records of its operations including: (1) Process or control device parameters; (2) bag leak detention systems; (3) maintenance plan for air pollution control devices (e.g., capture system and venturi scrubbers); (4) certification that monitoring devices are accurate; and (5) the implementation and corrective actions taken related to the startup, and shutdown and malfunction plan and the fugitive dust control plan. The types of periodic reports required by this regulation include: opacity-related reports; performance test results reports; immediate and periodic startup/shutdown/malfunction reports, quarterly emissions reports; capture hood inspection reports; fugitive dust operations reports; annual compliance status reports. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP (MACT) standards.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 83 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any

previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Ferroalloy production facilities that manufacture ferromanganese and silicomanganese and are major sources of HAPs or are co-located at major sources of HAPs.

Estimated Number of Respondents: 1.
Frequency of Response: Initial, quarterly, semiannual and annual.

Estimated Total Annual Hour Burden: 584 hours.

Estimated Total Annual Costs: \$37,261, which includes \$0 annualized capital/startup costs, \$0 annual O&M costs, and \$37,261 annual labor costs.

Changes in the Estimates: There is decrease of 162 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease in labor hours is due to the following assumptions: (1) The source has complied with the initial notification requirements and the initial compliance demonstration requirements since the effective date of the rule has passed; and (2) the source has already developed its record system including the startup, shutdown and malfunction plan; the fugitive dust plan; and the control equipment/maintenance plan.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act, as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564-7167. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in the **Federal Register** dated April 2, 2004 (69 FR 17403).

Draft EISs

ERP No. D-AFS-E65071-FL Rating EC1, Ocala National Forest Access

Designation Process, Roads and Trail Systems Development, Implementation, Lake, Marion, and Putnam Counties, FL.

Summary: While EPA supports the access designation process, it has environmental concerns that there are no commitments to either close, decommission, or monitor the remaining unclassified roads and trails to ensure that unregulated public travel will not continue.

ERP No. D-BIA-J02044-WY Rating EC1, Wind River Natural Gas Field Development Project, Construction, Drilling and Production Operation of Natural Gas Wells, Fremont County, WY.

Summary: EPA expressed concern regarding air quality and visual environmental impacts to Class 1 Airsheds, and recommended mitigation measures such as: Using electric drill rigs and new technology diesel engines; purchasing wind-generated electricity; and the Tribes should investigate and consider developing their own renewable electricity generation capability to power tribal related projects to reduce air emissions.

ERP No. D-BLM-J02043-CO Rating EO1, Northern San Juan Basin Coal Bed Methane Project, Proposed to Drill Approximately 300 Wells to Produce Natural Gas from Coal Beds on Federal, State and Private Owned Lands, Special-Use-Permit, Application for Permit to Drill and U.S. Army COE Section 404 Permit, LaPlata and Archulea Counties, CO.

Summary: EPA expressed environmental objections because of potential adverse impacts to human health from methane gas mitigation into home/businesses, impacts to drinking water wells and the potential of reduced visibility at Mesa Verde NP and Weminuche WA, and surface disturbing activities in an inventoried Roadless Area. EPA suggests the final EIS include additional mitigation measures for the employment of newer drilling technologies to reduce impacts.

Final EISs

ERP No. F-FHW-G40172-TX TX-121 Highway Construction, I-30 to Farm-to-Market 1187 (FM 1187), Funding, USCG Section 9 and US Army COE Section 10 and 404 Permits Issuance, Fort Worth, Tarrant County, TX.

Summary: EPA has no comments on the Final EIS. ERP No. F-FRC-L05227-00 Box Canyon Hydroelectric Project, (FERC Project No. 2042-013), New License Application for an existing 72-megawatt (Mw) Hydroelectric Project, Public Utility District (PUD) No. 1, Pend Oreille River, Pend Oreille County, WA and Bonner County, ID.

Summary: EPA continues to have concerns that studies and analyses needed to define project impacts and identify needed mitigation measures have been deferred until after issuance of a new license.

ERP No. F1-AFS-L61190-OR Mt. Ashland Ski Area Expansion, Site Specific Project, Maintenance and Enhancements of Environmental Resources, Implementation, Special Use Permit, Ashland Ranger District, Rogue River National Forest and Scott River Ranger District, Klamath National Forest, Jackson County, OR.

Summary: EPA supports the selection of Modified Alternative 2, which should mitigate sediment yield into streams.
