Foreign-Trade Zones Board

Review of Oil/Petrochemical Refinery Subzone Activity

Background. The Foreign-Trade Zones Board (the Board) has authorized 81 refinery/petrochemical complexes to conduct crude oil/petrochemical product refining activity under FTZ procedures. In 2000, active refinery/petrochemical subzones requested and were approved an indefinite extension of their NPF authority, which initially had been granted for a five-year period (Board Order 1116, 65 FR 52696, 8/30/2000). NPF authority involves full access to FTZ procedures for export activity and, with regard to products sold in the U.S., the ability to choose the Customs duty rates that apply to certain petrochemical products and refinery by-products (duty-free), by admitting incoming foreign inputs, such as crude oil, in non-privileged foreign status. Such petrochemicals and by-products account for about 20 to 25 percent of refinery activity, on average. [NPF authority does not apply to the foreign inputs used to produce other refinery products, such as gasoline, jet fuel, and heating oil (some 75-80% of output); they would continue to be subject to their normal duty rates.] The extension
