### SUPPLEMENTARY INFORMATION:

#### I. Background

The ETA-9016 Report is used by the Department of Labor to assess whether (and the extent to which) the requirements of the Immigration and Naturalization Service (INS), Systematic Alien Verification for Entitlement (SAVE) system are cost-effective and otherwise appropriate for the Unemployment Insurance (UI) program. In addition, data from the Alien Claims Activity report is being used to assist the Secretary of Labor in determining whether a State Workforce Agency's administrative costs associated with the verification program are reasonable and reimbursable. There is no other report or system available for collecting this required information. The report allows the Department of Labor to determine the number of aliens filing for UI, the number of benefit issues detected, the denials of benefits to aliens, the extent to which State Agencies use the system, and the overall effectiveness and cost efficiency of the verification system. If SWAs are not required to submit the information on the Alien Claims Activity Report, the Department of Labor would not be able to fulfill its responsibilities to assess the SAVE system.

#### II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
  - Enhance the quality, utility, and clarity of the information to be collected; and
  - Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or

#### I. Background

The ETA 9000 is the only data source available on instances of internal fraud activities within the Unemployment Insurance (UI) program and on the results of safeguards that have been implemented to deter and detect instances of internal fraud. The report categorizes the major areas susceptible to internal (employee) fraud and provides actual and "estimated" (predictability or cost avoidance measures) workload. The information from this report has been used and will be used to review Internal Security (IS) operations and obtain information on composite shifting patterns of nationwide activity and effectiveness in the area of internal fraud identification and prevention. The Employment and Training Administration has used this report to assess the overall adequacy of IS procedures in State Workforce Agencies (SWA) UI program administration.
