DEPARTMENT OF DEFENSE

Department of the Navy

Notice of Intent To Grant Exclusive Patent License; Radiant Images Incorporated

AGENCY: Department of the Navy, DOD.

ACTION: Notice.

SUMMARY: The Department of the Navy hereby gives notice of its intent to grant to Radiant Images Incorporated, a revocable, nonassignable, exclusive license in the United States to practice the Government-owned invention described in pending U.S. Patent Application, Ser. No. 10/614,426 entitled "Silicon-On-Sapphire Display Apparatus and Method of Fabricating Same".

DATES: Anyone wishing to object to the granting of this license has (15) days from the date of this notice to file written objections along with supporting evidence, if any.

ADDRESSES: Written objections are to be filed with the Office of Patent Counsel, Space and Naval Warfare Systems Center, Code 20012, 53510 Silvergate Ave., Room 103, San Diego, CA 92152-5765.

FOR FURTHER INFORMATION CONTACT: Mr. Peter A. Lipovsky, Space and Naval Warfare Systems Center, Code 20012, 53510 Silvergate Ave., Room 103, San Diego, CA 92152-5765, telephone 619-553-3824.

(Authority: 35 U.S.C. 207, 37 CFR Part 404.7(a).)

Dated: December 27, 2004.

J.H. Wagshul,

*Commander, Judge Advocate General's Corps,
U.S. Navy, Federal Register Liaison Officer.*

BILLING CODE 3810-FF-P

DELAWARE RIVER BASIN COMMISSION

Notice of Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold an informal conference followed by a public hearing on Wednesday,

January 19, 2005. The hearing will be part of the Commission's regular business meeting. Both the conference session and business meeting are open to the public and will be held at the Delaware River Basin Commission's offices, 25 State Police Drive in West Trenton, New Jersey.

The conference among the commissioners and staff will begin at 9:30 a.m. Topics of discussion will include: response to the Athos I oil spill; staff recommendations on a proposal to amend the Water Quality Regulations, Water Code and Comprehensive Plan to classify the Lower Delaware River as Special Protection Waters; progress report on Stage 2 TMDLs for PCBs in the Delaware Estuary; report on the Delaware Estuary Science Conference of January 10-12, 2005; report on the Flow Management Technical Advisory Committee Work Group Meetings of November 9-10 and December 3, 2004 and January 6 and 18, 2005; and a proposed resolution to adopt the Commission's annual budget for the fiscal year ending June 30, 2005 and to apportion among the signatory parties the amounts required for support of the Commission's annual and operating budgets.

The subjects of the public hearing to be held during the 1 p.m. business meeting include the dockets listed below:

1. *Knoll, Inc. D-74-162-2.* An application to modify a wastewater treatment plant discharge for the Knoll Furniture Manufacturing Facility located off Water Street, approximately 1,000 feet northeast of its intersection with Peevy Road in Upper Hanover Township, Montgomery County, Pennsylvania. No new treatment facilities are proposed. A junction box at the sewage treatment plant will be repaired, and the facility will be rerouted to include an additional 3,000 gallons of wastewater flow. Although the current docket provides for a flow of 0.07 million gallons per day (mgd), the wastewater treatment plant provides advanced treatment of a total flow of 0.073 mgd from sanitary, process and cooling water sources prior to discharge to Perkiomen Creek in the Schuylkill River Watershed.

2. *Alcoa Extrusions, Inc. D-82-5-3.* An application for the renewal of a ground water withdrawal project to reduce withdrawal from 21.6 million gallons per 30 days (mg/30 days) to 11.0 mg/30 days to supply the applicant's manufacturing facility from existing Wells Nos. 1 and 2 in the West Branch Schuylkill River Watershed. The project is located in Cressona Borough, Schuylkill County, Pennsylvania.

3. *Occidental Chemical Corporation D-83-9-2.* An application to amend the current docket, which provides for a discharge from the 0.3 million gallons per day (mgd) (design) industrial waste treatment plant (IWTP) to contain and treat mercury contaminated groundwater at the applicant's Delaware City chemical manufacturing plant located off State Route 9 in New Castle County, Delaware. Barrier walls have been constructed around the perimeter of the Process Area and Waste Lake 1. Contaminated groundwater from within these containments will be pumped at a maximum rate of 30 gallons per minute (43,200 gallons per day) for treatment at an activated carbon treatment system before being discharged to the existing IWTP for mercury removal. The IWTP discharge is to the Delaware River in Water Quality Zone 5.

4. *County of Chester D-83-15 CP-2.* An application to upgrade the applicant's existing 0.105 mgd sewage treatment plant (STP) from a secondary treatment facility to tertiary treatment with no increase in treatment capacity. The STP will continue to serve only the Pocopson Home and Prison. The STP is located approximately one-half mile north of the intersection of Route 52 and Wawaset Road in Pocopson Township, Chester County, Pennsylvania in the Pocopson Creek Watershed. The existing effluent spray field irrigation system will also be upgraded and no effluent discharge to surface water is proposed. (This docket was NAR'd as D-2004-7 CP.)

5. *Waste Management Disposal Services of Pennsylvania, Inc. D-88-54-2.* An application to modify a landfill leachate treatment plant discharge to the tidal Delaware River via a constructed discharge cove in Water Quality Zone 2. The treatment plant serves the Tullytown and GROWS Landfills and is located off Bordentown Road in Falls Township, Bucks County, Pennsylvania. The existing 0.1 million gallons per day leachate treatment plant utilizes the Best Available Treatment Technology but cannot consistently meet effluent total dissolved solids and color limits. The docket holder has requested modification of its docket to allow an increase in the average discharge concentration of Total Dissolved Solids to 10,000 mg/l from the current 6,560 mg/l and an increase in the maximum effluent limit for True Color to 1,500 units from the current 750 units on a platinum-cobalt scale. In support of its requested modifications, the docket holder has completed an environmental study that indicates the changes would result in no significant impact to the Delaware Estuary. No increase in
