**SUPPLEMENTARY INFORMATION:** EPA published a supplemental notice of proposed rulemaking (SNPRM) in the **Federal Register** on December 13, 2004 (69 FR 72140). That notice included a deadline for written comments of January 12, 2005. Since that time we have received requests for an extension of that deadline to allow additional time to review and comment on the proposed options for hot-spot analyses in PM<sub>2.5</sub> and PM<sub>10</sub> nonattainment and maintenance areas. As a result of these requests, EPA is extending the comment period on the supplemental proposal to January 27, 2005.

The requests received by EPA regarding an extension of the comment period focus on the ability of transportation conformity stakeholder groups to coordinate with their members and prepare meaningful comments during a 30-day comment period which includes two federal holidays. Stakeholder groups representing state and local air quality and transportation agencies and environmental and transportation advocacy groups frequently submit significant comments on proposed changes to the transportation conformity rule.

In the SNPRM, EPA requested comment on a wide range of options for hot-spot analyses in PM<sub>2.5</sub> and PM<sub>10</sub> nonattainment and maintenance areas

both before and after state implementation plans are submitted. Specifically, we asked commenters to submit research and data that indicate the existence and prevalence of PM<sub>2.5</sub> and PM<sub>10</sub> hot-spots as well as legal rationale to support options that they preferred. Many of the options proposed in the SNPRM require state and local agencies to make decisions regarding the existence of hot-spots in their area as well as decisions regarding the specific types of locations within a nonattainment or maintenance area that are most susceptible to a localized violation of the PM<sub>2.5</sub> or PM<sub>10</sub> air quality standard. As such, commenters were requested to submit information indicating whether or not they would have sufficient data to make the decisions required by each of these options. Finally, commenters were asked to submit information on whether the U.S. Department of Transportation should be allowed to make categorical conformity determinations for certain types of highway projects and on what types of highway projects could be eligible for a categorical conformity determination.

It should be noted that EPA was requested to extend the comment period by 30 days to February 11, 2005. EPA believes that it is necessary to strike a balance between the additional time that was requested to complete and submit comments and the need to finalize these requirements in sufficient time so that state and local transportation planners are prepared to implement them by the end of the one year conformity grace period that applies in PM<sub>2.5</sub> nonattainment areas. Given the timing of the publication of the SNPRM and the significant amount of information that is requested from commenters, EPA is extending the comment period to January 27, 2005.

Dated: December 28, 2004.
