With respect to the dissemination of revisions to WNGSR data, EIA is reconsidering its policy. Important issues to consider include: the size of a revision justifying a revised WNGSR release, the problem of equal and adequate notification of an upcoming revision, and the timing of revisions in light of government and market hours of operation. The current policy and two examples of alternative policies are described below.

**Current Policy (No Unscheduled Release of Revisions).** Revisions are disseminated in the next release of the WNGSR when the effect of changes from any cause is at least 7 billion cubic feet (Bcf) at either a regional or national level. If a revision is made, changes to all regions are included. Revisions are not disseminated on an unscheduled basis.

**Alternative 1 (Fixed Revision Timing).** When the cumulative effect of all revised data for the most recent report period is at least 15 billion cubic feet (BCF) at either a regional or national level, a revised WNGSR would be issued prior to the customary WNGSR release schedule (*i.e.*, generally Thursday at 10:30 a.m.). If a revision is necessary, it would be released in a revised WNGSR at 10:30 a.m. on the first Federal government workday of the following week. In most instances the timing would be 10:30 a.m. Monday unless there is a Monday holiday. In that case the revision would be released on Tuesday. No notification of a coming revision would be provided. If the issues underlying the revision could not be resolved and systems changes could not be implemented before the fixed release date, the revision would be released during the next regularly scheduled WNGSR release (usually Thursday morning). Revisions from 7 to 14 Bcf as well as a revision greater than 7 Bcf resulting from a new estimation methodology or sample used in the estimation process would be issued in the next regularly scheduled (usually Thursday) release of the WNGSR. This alternative provides a date and time for a mid-week release of a revision greater than 15 Bcf without relying on any notification to users of the estimates.

**Alternative 2 (Variable Revision Timing).** When the cumulative effect of

revised data for the most recent report period is at least 15 billion cubic feet (BCF) at either a regional or national level, a revised WNGSR would be issued two hours after EIA issues a notification of the planned release of the revised WNGSR. However, EIA would not issue a revised WNGSR if the next scheduled release is less than 24 hours later. Also, revisions from 7 to 14 Bcf as well as a revision of any magnitude greater than 7 Bcf resulting from a new estimation methodology or sample used in the estimation process would be issued in the next release of the WNGSR.

For alternative 2, EIA would notify the public of the planned release by announcing it on its Web site and sending e-mail notifications to parties registered on EIA's WNGSR list serve. (Interested parties may sign up for the WNGSR list serve without charge through the EIA Web site at [http://www.eia.doe.gov/listserv\\_signup.html](http://www.eia.doe.gov/listserv_signup.html).) EIA proposes that the revision be released two hours after the announcement is posted and e-mail notices are issued irrespective of whether any specific markets are in operation at the time of the revision release. EIA would post a notification of an upcoming revision only when it has resolved all implementation issues and is prepared to issue the revised WNGSR two hours later. Also, revisions from 7 to 14 Bcf as well as a revision of any magnitude greater than 7 Bcf resulting from a new estimation methodology or sample used in the estimation process would be issued in the next release of the WNGSR.

**III. Request for Comments**

The public should comment on the alternatives discussed in item II as well as the questions below. Comments may also address other issues and alternatives related to changes in the WNGSR revision policy.

General Issues:

A. What policy do you prefer for release of revised WNGSR data and why? What are the features of each policy that are attractive and unattractive?

B. What is the threshold, if any, at which a revised WNGSR should be issued outside a regular schedule? Is a

threshold change of 15 Bcf appropriate to require such an issuance?

C. Is a fixed revision date and time a useful alternative to an approach requiring a notification process for EIA customers? What particular dates and/or times are most appropriate?

D. If a notification approach is used, is a posting on EIA's web site and e-mail notification adequate and equitable? How much time should pass between a notification of a revised WNGSR and its release?

E. Should the release of a revised WNGSR be restricted to specific business hours or days because of the operating hours of various trading markets? For example, if a revised WNGSR is approved late in the work day, should EIA withhold issuing it until specific major energy markets are open?

Comments submitted in response to this notice will be considered during development of EIA's policy for revisions of the WNGSR. The comments will also become a matter of public record.

After EIA has completed development of the WNGSR revision policy, a **Federal Register** notice will be issued announcing the policy.

### Standard Paragraph

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all parties to this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC.
